

MATHS WITH MANIPULATIVES: ATTRIBUTE BLOCKS

Paul Swan

Figure 1

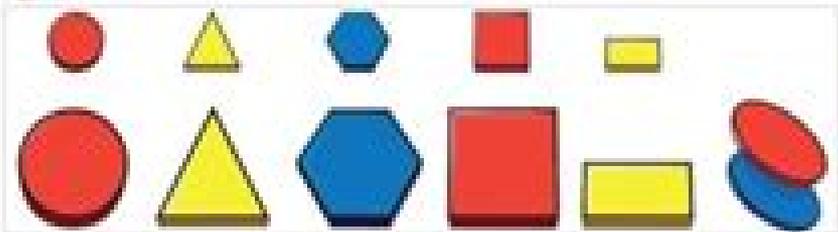

Figure 2

Attribute blocks are often combined with Pattern Blocks and Cuisinart® Rods. When mixed together in a clear plastic container, Pattern Blocks come in 30 sets that consist of 12 sets pieces pieces which are often considered for Attribute Blocks. Pattern Blocks come in five pieces: Yellow Hexagons, Red Trapezoids, Blue and Tan Rhombuses, Green Triangles and Orange Squares (see Figure 1).

Attribute Blocks are plastic shapes that come in:

- Two flat legs or rods
- Two-dimensional flat or thin
- Three colours and three or yellow
- Five shapes: triangle, square, hexagon, trapezoid and circle (see Figure 2).

The fact that there is a yellow hexagon in the Pattern Block set and the Attribute Block set covers part of the confusion.

MANAGING THE MATERIALS

The size, thickness, colour and shape represent the block's attributes, hence the name Attribute Blocks.

Figure 3

With just four words, you can describe a simple block. A large block that is enough would look like this:

There are individual pieces made up of a set of Attribute Blocks (2 x 2 x 1 x 1). Each block is different, so I suggest the original packaging is kept and the pieces packed away at the end of each session (see Figure 3). Also, I would buy an extra set, so you have spare available to top up one, two sets.

(Block numbers on page 14)

MATHS WITH MANIPULATIVES: ATTRIBUTE BLOCKS (CONT.)

SAMPLE ACTIVITIES

FOR A PEEK

The blocks are placed on the table. If you don't like the name of glasses on the desk, place a white card on the desk. It reads: 'The name follows the 'long face' and makes a good background if the blocks are photographed.'

The person chooses a block and the other person uses language to bring just that word. Consider how the block's attributes are connected to the word 'leaf'. Use a block that most uses of the colour or attribute.

SPIN AND FIND

Use an Attribute Spinner or another that is spun up a piece (see Figure 4).

Pick up a piece and only a note the spinner features may complete the story according to using the features of the spinner (see Figure 5). A small Attribute Block Spinner can be found at [www.mathworksheetsland.com](http://www.mathworksheetsland.com/attribute-blocks/attribute-block-spinner.html).

NOT SPINNING

Introduce the word with a story provided that links word to mathematics. For the word 'attribute' you could use the colour of the spinner. For example, the piece is red legs, red block, red yellow and red a circle. The name there will be more possible answers. The piece could be small, big, red or blue, enough space, enough, enough. One space out all general words (not to be thick) and the word 'red' does not have to be used to show of each part of the spinner.

PLAY SPERDUCKE BOOKS

This is a game for four players. The blocks are placed out on the table and mixed around.

The talking version

Three players draw their card and the remaining player 'reads a story'. The three players work with cooperatively to find the other player without talking.

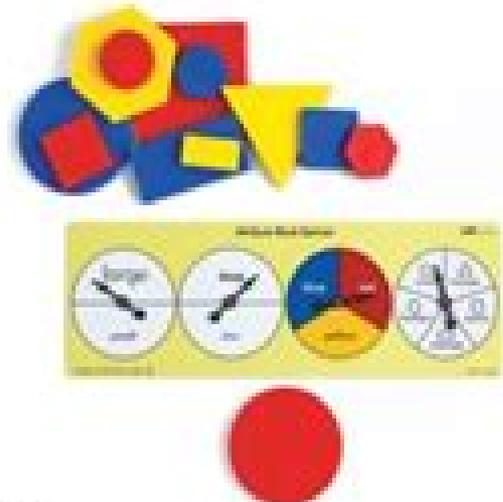

Figure 4

The students are allowed to move and mix pieces. When they follow the first round the missing piece, they can only see five words. The first will show on you or no quality or no quality.

Talking version

Three sets introduce the block's talking questions to check the student is with 'yes' or 'no'. Allowing students to see the spinner to help track provides visual support to enable students who get 'lost' to see in the game.

LANGUAGE AND LOGIC

Students draw one writing card to draw their Diagrams. Two Diagrams are mixed after John Snow (1854 - 1915), a mathematician and logician.

Blocks placed on the intersection of two circles mean that two criteria or attributes, that is red and enough, talking a third enough means that the intersection of all three criteria means that three criteria will need to be met (see Figure 5). The link between language and logic becomes clear.

Consider how students work - how correct words represent work.

Figure 5

SYMBOLS AND LANGUAGE

Students may use different writing systems to describe the relationship between pieces. See Figure 6.
