

HARDWARE TOOLS

To complete hardware repairs, it is important to have a toolkit that should contain all of the necessary tools.

As you gain experience, you will learn which tools to have available for different types of jobs.

Hardware tools are grouped into these four categories:

- ✓ Electro-Static Discharge (ESD) tools
- ✓ Hand tools
- ✓ Cleaning tools
- ✓ Diagnostic tools

ELECTRO-STATIC DISCHARGE (ESD) TOOLS

Static electricity is easily generated by friction on carpets, tile flooring, clothing, hair, fabric, and etc.

The friction of moving air alone will charge suspended particles and cause the buildup of static electrical charges on people and objects in the environment.

Examples of ESD Tools:

	<p>Anti-static wrist strap – used to prevent ESD damage to computer equipment.</p>
	<p>Anti-static mat – used to stand on or place hardware on to prevent static electricity from building up.</p>

HAND TOOLS

A **hand tool** is a device for performing work on a material or a physical system using only hands.

The hand tools can be manually used employing force, or electrically powered, using electrical current.

Examples of Hand Tools:

	<p>Flat head screwdriver – used to loosen or tighten slotted screws.</p>
	<p>Phillips head screwdriver – used to loosen or tighten crosshead screws.</p>
	<p>Torx screwdriver – used to loosen or tighten screws that have a star-like depression on the top, a feature that is mainly found on laptop.</p>
	<p>Hex driver – sometimes called a nut driver, is used to tighten nuts in the same way that a screwdriver tightens screws.</p>
	<p>Needle-nose plier – used to hold small parts.</p>

	<p>Wire cutter – used to strip and cut wires.</p>
	<p>Tweezers – used to manipulate small parts.</p>
	<p>Part retriever – used to retrieve parts from location that are too small for your hand to fit.</p>
	<p>Flashlight – used to light up areas that you cannot see clearly.</p>

CLEANING TOOLS

Having the appropriate cleaning tools is essential when maintaining or repairing computers.

Using these tools ensures that computer components are not damaged during cleaning.

Examples:

	<p>Lint-free cloth – used to clean different computer components without scratching or leaving debris.</p>
	<p>Compressed air – used to blow away dust and debris from different computer parts without touching the components.</p>
	<p>Cable ties – used to bundle cables neatly inside and outside of a computer.</p>
	<p>Parts organizer – used to hold screw, jumpers, fasteners and other small parts and prevents them from getting mixed together.</p>

DIAGNOSTIC TOOLS

Computers are easier to use and are more dependable with each new generation of hardware and operating system updates, but that doesn't mean that they're problem-free.

Here are the most popular tools for diagnosing your computer problems:

	<p>Multimeter – used to test the integrity of circuits and the quality of electricity in computer components.</p>
	<p>Loopback Adapter – used to test the functionality of computer ports.</p>
