currently disturbed globally How much land could be disturbed by metal mining in 2050 This study investigates the global
area disturbed by mining of iron bauxite copper gold and silver for the first time The first part consists of the calculation of
the specific land requirements i e the area newly disturbed caused by the ore extraction at the mine site The second part
addresses the global area disturbed in the year 2011 whereas the third presents scenarios of how such area might evolve
until 2050 The last part addresses the current and future pressures on global biodiversity by metal mines and shows
possibilities for the future opening of new mines in low biodiversity areas alleviating pressures in high biodiversity ones This
study presents the findings of the author s dissertation hoping they are used as a frame to develop policies and incentives to
reduce the amount of area directly disturbed by mines and their pressures on biodiversity Te Math Advantage 98 Gr 6
