Measuring Dewlap Color

You will assign a "brightness" score—a number from 1 to 6, with 6 being the brightest—to 10 dewlaps.

Drag the color strips left and right until you match a swatch with the color next to the black arrow.

In some cases, the dewlap color is different in the center than near the edge, which is why you are taking two color readings per lizard. The mean of the two measurements is directly calculated for you.

Center dewlap color: 3

Edge dewlap color: 6

Mean dewlap color: 4.5
