Key Issues in English for Specific Purposes in Higher Education Yasemin Kırkgöz, Kenan Dikilitaş, 2018-01-08 This volume offers research based studies on English for Specific Purposes in higher education from across the world By drawing on international studies the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs teachers and learners in a coherent fashion There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world Knowledge of ESP is an important factor in subject matter learning by students and also closely related to the performance of university graduates in the relevant sectors Careful planning and efficient implementation are essential to ensure the quality of the language learning process For a variety of reasons it proves difficult to maintain ESP instruction in higher education These reasons include the incompetence of teachers lack of materials for that specific context as well as lack of opportunities for ESP teachers to develop their skills The chapters in this book taken from a wide variety of countries shed light on the diversity of current practices and issues surrounding ESP

The Oxford Handbook of the Learning Organization Anders Örténblad, 2019-12-17 The concept of the learning organization is one of the most popular management ideas of the last few decades Since it was conceived as an idea in its own right it has been given various definitions and meanings such that we are still faced with the question as to whether any unified understanding of what the learning organization really is can be established This Handbook offers extensive reviews of both new and traditional perspectives on the concept and provides suggestions for how the learning organization can best be defined practiced studied and developed in future research With contributions from long standing scholars in the field as well as those new to the area this book aims to bridge the gap between traditional and more critical perspectives and in doing so find alternative features and angles to take the idea forward In addition to elaborating on and developing older definitions of the learning organization and suggesting updated and even new definitions the chapters also provide focused explorations on pertinent aspects of the learning organization such as ambidexterity gender inclusivity and systems thinking They also survey organizations that have made efforts towards becoming learning organizations how the learning organization can best be measured and studied and the universality of the idea itself Some of the questions raised in this book are answered or at least given tentative answers while other questions are left open In this way the book has the ambition to take the learning organization an important step further whilst having no intentions to take any final step instead the intention is that others will endeavour to continue where this book stops
