Multi-Agent Oriented Programming Olivier Boissier, Rafael H. Bordini, Jomi Hubner, Alessandro Ricci, 2020-09-15 The main concepts and techniques of multi agent oriented programming which supports the multi agent systems paradigm at the programming level A multi agent system is an organized ensemble of autonomous intelligent goal oriented entities called agents communicating with each other and interacting within an environment This book introduces the main concepts and techniques of multi agent oriented programming MAOP which supports the multi agent systems paradigm at the

programming level MAOP provides a structured approach based on three integrated dimensions which the book examines in detail the agent dimension used to design the individual interacting entities the environment dimension which allows the development of shared resources and connections to the real world and the organization dimension which structures the interactions among the autonomous agents and the shared environment The book puts the approach into practice using the JaCaMo programming model and platform It employs an easy to follow step by step style showing solutions to increasingly complex scenarios The book also discusses the integration of MAOP into existing technologies and application domains including mobile computing web based computing and robotics Finally it considers artificial intelligence AI related classical problems from an MAOP perspective and discusses an agent oriented approach to software engineering Agent-Oriented Software Engineering Onn Shehory, Arnon Sturm, 2014-06-02 With this book Onn Shehory and Arnon Sturm together with further contributors introduce the reader to various facets of agent oriented software engineering AOSE They provide a selected collection of state of the art findings which combines research from information systems artificial intelligence distributed systems and software engineering and covers essential development aspects of agent based systems The book chapters are organized into five parts The first part introduces the AOSE domain in general including introduction to agents and the peculiarities of software engineering for developing MAS The second part describes general aspects of AOSE like architectural models design patterns and communication Next part three discusses AOSE methodologies and associated research directions and elaborates on Prometheus O MaSE and INGENIAS Part four then addresses agent oriented programming languages Finally the fifth part presents studies related to the implementation of agents and multi agent systems The book not only provides a comprehensive review of design approaches for specifying agent based systems but also covers implementation aspects such as communication standards and tools and environments for developing agent based systems It is thus of interest to researchers practitioners and students who are interested in exploring the agent paradigm for developing software systems *PRIMA 2015: Principles and Practice of Multi-Agent Systems* Qingliang Chen, Paolo Torroni, Serena Villata, Jane Hsu, Andrea Omicini, 2015-10-20 This book constitutes the proceedings of the 18th International Conference on Principles and Practice of Multi Agent Systems PRIMA 2015 held in Bertinoro Italy in October 2015 The 29 full papers and 24 short papers presented in this volume were carefully reviewed and selected from 94 submissions The conference brings together active researchers developers and practitioners from both academia and industry to showcase share and promote research in several domains ranging from foundations of agent theory and engineering aspects of agent systems to emerging interdisciplinary areas of agent based research **Models and Theories in Social Systems** Cristina Flaut, Šárka Hošková-Mayerová, Daniel Flaut, 2018-10-12 This book concisely presents a broad range of models and theories on social systems Because of the huge spectrum of topics involving social systems various issues related to Mathematics Statistics Teaching Social Science and Economics are discussed In an effort to introduce the

subject to a wider audience this volume part of the series Studies in Systems Decision and Control equally addresses the needs of mathematicians statisticians sociologists and philosophers The studies examined here are divided into four parts The first part Perusing the Minds Behind Scientific Discoveries traces the winding path of Syamal K Sen and Ravi P Agarwal s scholarship throughout history and most importantly the thought processes that allowed each of them to master their subject The second part covers Theories in Social Systems and the third discusses Models in Social Systems while the fourth and final part is dedicated to Mathematical Methods in the Social Sciences Given its breadth of coverage the book will offer inquisitive readers a valuable point of departure for exploring these rich vast and ever expanding fields of knowledge
