expectations of a product or service The achievement needs to be The right thing right first time every time in time Beginning with manufacturing and services it also includes professional personal and spiritual dimensions Variation does not sit happily with consistency and skill in handling risk and opportunity requires competence in the use of statistics probability and uncertainty and needs to complement the critically essential soft dimensions of quality and the overarching and underpinning primacy of personal relationships There are no clear boundaries to the applicability of quality and the related processes and procedures expressed in management systems and this is why it matters so much to show how it applies in diverse business and social environments Increasingly the acceptability of boundaries that are drawn depends on their effect on the user and the achievement of quality and the latest standards on quality management are explicit on this key point Quality is everyone's business and there is no single professional discipline that can properly express this Insights knowledge experience best practice tools and techniques need to be shared across all kinds of organizational and professional boundaries and there is no departmental boundary that can stand apart from the organization wide commitment to quality achievement
