

GATTACA movie assignment

Answer the following questions while watching a very relevant DNA based science fiction movie!

1. One of the opening lines is quoted as saying that Mother Nature wants us to tamper with her aka mess with our DNA. Knowing that DNA mutations occur from influence on outside parameters as well as DNA polymerase "mess ups," do you think this is true? Should we be tampering with DNA loci in our body? Why or why not?

2. Why is "Jerome" planting dead skin cells and vacuuming up his own?

3. Vincent's cells are deconstructed and DNA is read nearly instantaneously after birth. His genetic life is told to his parents almost immediately, and even a potential cause of death. Do you agree that a DNA test can be so accurate over so many broad developmental topics? What have we learned in this course that proves that your DNA is just the start and that it doesn't always predict outcome? Use a genetic principle for gene expression to explain the second part.

4. Anton's genes were preselected to a great degree before he was even born and in fact, when "he" was only 4 cells! Do you think that we can really be as precise as in the movie? If we had the capacity to such work, would you even want to tinker with your child's DNA?

5. How do you feel knowing that Vincent can be so harshly discriminated against solely based on his genetic fingerprint? What if jobs really took genetic testing into account, would that be fair business practice?

6. The real Jerome comments on the burden of perfection. This concept consumes Jerome's thoughts when it didn't really need to. Why do you think the burden of perfection was too much for the real Jerome to deal with in his life?

7. In the movie there are genetic testing kiosks with people testing DNA on the spot! Do you think this is even feasible in the near future? What is Uma Thurman's character trying to uncover by testing Vincent's DNA profile?

8. Do you think that someone can outperform his or her genetic potential?
