

Natural Selection Laboratory

Introduction:

Several bird species live in a small, grassy habitat where they compete for the same food resources. Each bird species has a different beak type in which to capture 3 main prey in the habitat. As participants, you will determine what beak type will be selected for in this habitat.

The class will be divided into groups to represent the 3 beak types: forks, spoons, and knives. The members of each group will work together to try and help maintain the existence of their species.

Materials:

Beaks - Forks, spoons, knives

Prey - wheel pasta, shell pasta, popcorn kernels

Habitat - Piece of large construction paper

Plastic cups

Stopwatch

Graph paper

Pencil

Procedure:

1. Within your group: select 3 birds and 1 data collector
2. As a group, brainstorm on how your beak will be best utilized in the habitat. Describe ways in which the beak can capture prey:
3. Form a hypothesis on how you think your beak will do capturing prey compared with the others. (ie. We hypothesize that the knife will capture the most prey because...). Write the hypothesis on your lab report sheet.
4. Lay your habitat on the table. Birds will get ready outside of the habitat with feeding tool and 1 cup per bird.
5. The data collector should easily pour out the prey and spread it out evenly within the habitat. Make sure all prey are located in the habitat (on the construction paper).
6. The teacher (timer) will say GO and for 1 minute, birds will capture prey with their "beak" and place the prey in the cup. DO NOT use 2 hands or the cup to capture prey. Keep cup vertical. Do not touch or push away any of the other beaks. All prey must stay in the habitat to be captured.
7. While the birds collect prey, observers (the data collector) should be taking notes on how the birds are capturing prey.
8. After 1 minute, the timer says STOP and the birds exit the habitat.
9. The birds go back to the group and the group counts prey by type and then total prey.
10. The data collector records results in TABLE 1 under FEEDING 1.
11. After the prey are counted, put it aside and repeat steps 4-9 for 2 more feeding periods.
12. After the feeding periods, all groups in the class will report results to complete the table.
