Groupware: Design, Implementation, and Use Jesus Favela, Dominique Decouchant, 2003-09-24 This book constitutes the refereed proceedings of the 9th International Workshop on Groupware CRIWG 2003 held in Autrans France in September 2003 The 30 revised full papers presented together with an invited keynote paper were carefully reviewed and selected from 84 submissions The papers are organized in topical sections on workspaces and groupware infrastructure tailoring groupware evaluation flexible workflow CSCL awareness supporting collaborative processes workflow management systems context in groupware supporting communities Field Programmable Logic and Applications Patrick Lysaght, James Irvine, Reiner Hartenstein, 2004-06-22 This book contains the papers presented at the 9th International Workshop on Field Programmable Logic and Applications FPL 99 hosted by the University of Strathclyde in Glasgow Scotland August 30 September 1 1999 FPL 99 is the ninth in the series of annual FPL workshops The FPL 99 programme committee has been fortunate to have received a large number of high quality papers addressing a wide range of topics From these 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions A total of 65 papers from 20 countries are included in this volume FPL is a subject area that attracts researchers from both electronic engineering and computer science Whether we are engaged in research into software or hardware seems to be primarily a question of perspective What is unquestionable is that the interaction of groups of researchers from different backgrounds results in stimulating and productive research As we prepare for the new millennium the premier European forum for researchers in field programmable logic remains the FPL workshop Next year the FPL series of workshops will celebrate its tenth anniversary The contribution of so many overseas researchers has been a particularly attractive feature of these events giving them a truly international perspective while the informal and convivial atmosphere that pervades the workshops have been their hallmark We look forward to preserving these features in the future while continuing to expand the size and quality of the events **ECOOP - Object-Oriented Programming** Erik Ernst, 2007-07-27 The 21st European Conference on Object Oriented Programming ECOOP 2007 was held in Berlin Germany on July 30 to August 3 2007 ECOOP is the most important and inspiring forum in Europe and beyond for researchers practitioners and students working in that smorgasbord of topics and approaches known as object orientation This topic area was explored and challenged by excellent invited speakers two of which were the winners of this year's Dahl Nygaard award in the carefully refereed and selected technical papers on posters via demonstrations and in tutorials Each of the many workshops complemented this with a very interactive and dynamic treatment of more specific topics namely panels allowed for loud and lively disagreement Yet it is one of ECOOP's special qualities that this plethora of activities add up to a coherent and exciting whole rather than deteriorating into chaos The Program Committee received 161 submissions this year Only 135 of them were carried through the full review process because of a number of retractions and a number of submissions of abstracts that were never followed

by a full paper However the remaining papers were of very high quality and we accepted 25 of them for publication Helping very good papers to be published is more useful than having an impressively low acceptance rate The papers were selected according to four groups of criteria whose priority depended on the paper relevance originality and significance precision and correctness and presentation and clarity Each paper had three four or five reviews depending on how controversial it was

Introduction to Programming with Java: A Problem Solving Approach John Dean, Ray Dean, 2007-12-29. This book teaches the reader how to write programs using Java. It does so with a unique approach that combines fundamentals first with objects early. The book transitions smoothly through a carefully selected set of procedural programming fundamentals to object oriented fundamentals. During this early transition and beyond, the book emphasizes problem solving. For example, Chapter 2 is devoted to algorithm development, Chapter 8 is devoted to program design and problem solving sections appear throughout the book. Problem solving skills are fostered with the help of an interactive, iterative presentation style. Here's the problem. How can we solve it? How can we improve the solution? Some key features include:

- A conversational, easy-to-follow writing style.
- Many executable code examples that clearly and efficiently illustrate key concepts.
- Extensive use of UML class diagrams to specify problem organization.
- Simple GUI programming early in an optional standalone graphics track.
- Well-identified alternatives for altering the book's sequence to fit individual needs.
- Well-developed projects in six different academic disciplines with a handy summary.
- Detailed, customizable PowerPoint™ lecture slides with icon-keyed hidden notes.
- Student Resources: Links to compiler software for Sun's Java2 SDK toolkit, Helios's TextPad, Eclipse, NetBeans, and BlueJ.
- TextPad tutorial, Eclipse tutorials, Textbook errata.
- All textbook example programs and associated resource files.
- Instructor Resources: Customizable PowerPoint lecture slides with hidden notes.
- Hidden notes provide comments that supplement the displayed text in the lecture slides. For example, if the displayed text asks a question, the hidden notes provide the answer.
- Exercise solutions, Project solutions.
- Supplemental Chapters to Accommodate an Objects Late Approach are available. [Click this link](#) to reach the supplemental chapters.

The authors have done a superb job of organizing the various chapters to allow the students to enjoy programming in Java from day one. I am deeply impressed with the entire textbook. I would have my students keep this text and use it throughout their academic career as an excellent Java programming source book.

Benjamin B. Nystuen, University of Colorado at Colorado Springs. The authors have done a great job in describing the technical aspects of programming. The authors have an immensely readable writing style. I have an extremely favorable impression of Dean and Dean's proposed text.

Shyamal Mitra, University of Texas at Austin. The overall impression of the book was that it was friendly to read. I think this is a great strength, simply because students reading it and especially students who are prone to reading to understand will appreciate this approach rather than the regular hardcore programming mentality.

Andree Jacobson, University of New Mexico. [Java How to Program \(early Objects\), 9/e](#) Paul Deitel, Harvey Deitel, 2011. The Deitels' groundbreaking How to Program series offers unparalleled breadth and depth of object-oriented programming concepts and intermediate-level topics for further study. Their Live Code Approach features thousands of lines of code in hundreds of complete working programs. This enables readers to confirm that programs run as expected.

Java How to Program Early Objects 9e contains an optional, extensive OOD UML 2 case study on developing and
