Matsui Electronics User Guide:

Use of Digital Human Modeling for Promoting Health, Care and Well-Being Sofia Scataglini, Steven Truijen, Ravindra S. Goonetilleke, 2026-02-17 In recent years the field of digital human modeling DHM has emerged as a powerful tool for enhancing health safety and overall well being across various domains DHM involves the creation by modeling and simulation of virtual representations of human beings enabling researchers designers and practitioners to analyze and optimize human interactions and interaction with environments products and systems This Research Topic aims to explore the diverse applications of DHM in promoting health and well being encompassing areas such as ergonomics healthcare simulation rehabilitation personalized medicine and safety analysis The utilization of DHM in ergonomic design is of paramount importance in reducing the risk of musculoskeletal disorders and injuries in the workplace By simulating human movements postures and forces DHM facilitates the development of ergonomic workstations tools and equipment that minimize physical of injuries and optimize the end user performance Furthermore DHM plays a crucial role in enhancing accessibility and inclusivity in product design by evaluating designs from a human centric perspective ensuring usability for individuals of diverse abilities In the realm of healthcare DHM enables simulation based training for healthcare professionals allowing them to refine their skills in a risk free environment and improve patient safety Additionally DHM contributes to the development of virtual rehabilitation programs and assistive technologies empowering individuals with disabilities to regain mobility and independence Furthermore the integration of DHM with anthropometric data by 3D 4D scanning data enables personalized health monitoring and analysis supporting tailored interventions and preventive healthcare strategies for precision medicine By leveraging cutting edge simulation techniques DHM enables the creation of personalized rehabilitation programs tailored to individual needs This empowers individuals with disabilities to regain mobility and independence fostering a sense of empowerment and improving their overall quality of life From virtual reality based exercises to sensor assisted prosthetics DHM opens doors to innovative solutions that break barriers and redefine possibilities in rehabilitation and assistive care By simulating human behavior and interactions in complex scenarios DHM enables stakeholders to identify potential hazards and mitigate risks effectively Whether it s optimizing workplace ergonomics enhancing product design for user safety or planning disaster response strategies DHM serves as a valuable tool for improving safety standards and reducing the likelihood of accidents and injuries This Research Topic invites researchers practitioners and stakeholders to submit original research review papers and case studies that explore the use of DHM for promoting health and well being Topics of interest include but are not limited to 1 Biomechanics and ergonomics 2 Healthcare simulation and training 3 Rehabilitation and assistive technologies 4 Personalized medicine and health monitoring 5 Safety analysis and risk assessment We welcome contributions that demonstrate innovative applications methodologies and case studies showcasing the transformative potential of DHM in advancing human health and well being **Japan Electronics Buyers' Guide**, 1995
