5. (5.4D) Joel and a group of friends always play soccer together at recess. Every day students join them at recess to play soccer. The table shows the relationship between the number of students joining Joel and his friends and the total number of students playing soccer.

**Students Playing Soccer**

Day	Number of Students Joining	Total Number of Students Playing Soccer
Monday	4	12
Tuesday	2	6
Wednesday	9	27
Thursday	5	15

The type of relationship that exists between the number of students joining and the total number of students playing is

- A. An additive relationship, because the pattern is to add 8 to the number of students joining in order to get the total number of students playing soccer.
- B. A multiplicative relationship, because the total number of students playing soccer is greater than the number of students joining.
- C. An additive relationship, because the number of students joining is less than the total number of students playing soccer.
- D. A multiplicative relationship, because the pattern is to multiply the number of students joining by 3 in order to get the total number of students playing soccer.
