

Auditory Learning

Guide for Parents and Teachers

Understanding Auditory Learning

Auditory learners process information best when they hear it. These learners often remember what they hear in lectures, discussions and audio recordings.

They thrive in environments where verbal communication and listening play a key role.

How to Determine Your Child's Learning Style

Before tailoring teaching strategies, it's important to identify your child's preferred learning style.

Most children show tendencies toward one or more of the following learning styles: **auditory**, **visual** or **kinesthetic/tactile**.

Auditory Learning Guide for Parents and Teachers

Ask Questions

Example questions:

- "Do you remember things better when you hear them or see them?"
- "Do you like listening to stories or reading them yourself?"

Try Different Techniques

Present the same information in multiple ways (e.g. written, written, facilitated) and observe which methods they prefer and understand best.

Use Learning Style Inventories

Simple online surveys or educator-developed tools can help guide identification.

Common Traits of Auditory Learners

- They learn better through spoken instructions and have a strong memory for spoken information.
- They remember what they hear more easily than what they read or see (written learners enjoy conversations and discussions).
- They prefer environments where they can listen to others and participate in verbal discussions.
- They may want to learn about learning if they are listening mostly to someone talking, music or TV.
