McDonald's the Nurse Educator's Guide to Assessing Learning Outcomes Tresa Kaur, 2024-12-09 McDonald's *The Nurse Educator's Guide to Assessing Learning Outcomes* Fifth Edition is a comprehensive guide for nurse educators that covers the assessment of critical thinking, the development of learning objectives and the creation of tests including detailed tips for writing many kinds of individual test items. This unique resource also covers the analysis of test reliability. Examples of effective and ineffective test items are included throughout to help faculty and nurse educators deepen their understanding of how to create effective tests and assess student learning. The updated Fifth Edition features two new chapters dedicated to the NextGen NCLEX to prepare faculty to develop questions for their students addressing the move from critical thinking to clinical judgment.

**Developing and Validating Multiple-choice Test Items** Thomas M. Haladyna, 1994 This is the most current and comprehensive book devoted to item writing. It addresses the related topics of multiple choice test item development and validation of responses to these test items, two critical steps in the development of any cognitive test. In so doing, the volume provides a conceptual basis for item writing, reviews the issue of constructed versus selected response testing, presents a variety of formats, provides guidance in developing items as well as a basis for reviewing, evaluating and improving items, and speculates about the future of item development and validation. This book helps readers better understand the concepts, principles and procedures available to build better test items that will lead to more reliable tests of ability and achievement.
