Value Management Roy M. Woodhead, Clive G. Downs, 2001 Value Management VM as a decision making process enables stakeholders to enhance the value provided by a project While this often leads to cost savings more importantly it seeks to provide the best outcome for a project by considering a variety of assessment criteria These assessment criteria allow customers and other stakeholders to recognise the project as preferable to other alternatives This report is one of the few to look at Value Management from the client's procurement perspective Based on extensive empirical research over a period of one year in the UK it examines why clients use Value Management how they use it and what benefits they achieve by applying it This publication acts as a third party facilitator helping both clients and providers improve VM The text provides a comprehensive summary for those wishing to improve organisational Value Creation for all stakeholders and explains how to improve Value Management in a structured way to enhance competitive advantage Value Management improving capabilities provides a toolkit to help individual clients and their suppliers structure conversations from which both parties can agree what and how improvements can be made to their VM processes By reading this report and then using the self assessment and self improvement sections readers will be in a position to reap the benefits that Value Management can bring to their organisation and to its projects

Managing Engineering Processes in Large Infrastructure

Projects Pascal Bohulu Mabelo, 2021-10-11 Project managers are often scolded and crucified for the massive overruns plaguing their megaprojects While some project managers may deserve the blame a closer look would reveal that many competent ones are bearing the brunt of the failure not of Project Management as such but of Engineering Management Project management experts would eventually concede that once the engineering team loses control over the technical content you can no longer control the time or money spent on it Engineering mistakes and other design discrepancies always breed overruns in projects and poor performance in subsequent operations because those design errors will cause difficulties during construction and engender recurring malfunctions in operations No cost and schedule management tools or weekly status reports can prevent or remedy those situations Therefore proceeding from the Systems Thinking approach this book discusses the causes of and explores methods that address such insidious predicaments It examines topics ranging from stakeholders needs and requirements to how they ought to be translated into functions so that they may be performed by the systems under development Design and development processes and methods as well as their generic outputs and respective lifecycle implications are also discussed based on practical real life examples
