modernity It is however in revealing this disjunction that the book opens up the possibility of moving beyond the already tired assessment of environmental law through the binary of anthropocentrism and ecocentrism Cases and Materials on Environmental Law Daniel A. Farber, Jody Freeman, Ann E. Carlson, 2010 The Eighth Edition provides up to date treatment of climate change issues This classic casebook provides students with a thorough understanding of all major federal environmental regulatory schemes as well as insight into current policy controversies Particular attention is given to the proper role of cost benefit analysis the appropriate judicial role in reviewing agency decisions and the impact of constitutional decisions relating to federalism standing and takings It also covers the latest Supreme Court cases on subjects from Superfund to water pollution as well as the major regulatory changes in the first year of the Obama Administration

Making Climate Lawyers Kimberly K. Smith, 2024-04-11 Why did it take so long for American law schools to start teaching about climate change Although most environmental law professors were aware of climate change by 1990 it took nearly fifteen years for them to incorporate the topic into their curriculum In her innovative new work Kimberly K Smith explores how American environmental law professors have addressed climate change identifying the barriers they faced how they overcame them and how they created climate law as a domain of legal specialization Making Climate Lawyers explores the history of why American law schools were resistant to teaching about climate change and how that changed over the course of a forty year period resulting in law schools across the country incorporating climate change into their curricula with many even establishing centers on the environment Smith challenges dominant explanations of why the United States was slow to develop climate policy it wasn't just political opposition or short sightedness Creating climate legal professionals required changing the fundamentals of legal education Based on dozens of interviews with faculty and students Making Climate Lawyers fills a gap in the literature on the intellectual history of climate change most of which focuses on the history of climate science Smith focuses instead on how the climate problem fits or doesn't fit into the structure of American law She uses this story as a lens through which to understand both the transformation of legal education since the 1980s and the nature of climate change as a policy problem **Environmental Law Issues Confronting the Oil and Gas Industry**
