

Be Water Wise

The average Canadian person uses an average of 136L of water per day! How might you cut down on the amount of water you use?

Only fill the kettle as much as you need. This saves electricity too!

Make sure you turn the tap off. Dripping taps waste lots of water!

Save rainwater to water your garden and house plants.

Soak fruits and vegetables in a filled bucket or sink, instead of rinsing while the faucet is running.

Have a short shower instead of a bath - it only uses half the water.

Ask your grown-ups to only use the washing machine when there is a full load.

Don't let the water run while washing hands or brushing your teeth. Turn it off while you lather or brush and back on to rinse at the end.
