ICD 10 CM is a morbidity classification published by the United States for classifying diagnoses and reason for visits in all health care settings. The ICD 10 CM is based on the ICD 10 the statistical classification of disease published by the World Health Organization WHO. These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD 10 CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD 10 CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD 10 CM but provide additional instruction. Adherence to these guidelines when assigning ICD 10 CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes Tabular List and Alphabetic Index have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation, accurate coding cannot be achieved.
