Details of the design and data analysis associated with the 1988 National Assessment of Educational Progress NAEP are presented. The 1988 NAEP surveyed American students' knowledge of reading, writing, civics, U.S. history, and geography. Small-scale studies were conducted for mathematics and science. Populations included public school students and private school students aged 9, 13, and 17 years, as well as students in grades 4, 8, and 12. Geography was surveyed only at grade 12, age 17 years. The objective of these technical notes is to provide information to allow the reader to judge the utility of the design, quality of the NAEP data, reasonableness of the assumptions made, appropriateness of the data analyses, and generalizability of the inferences made from the data. Topics addressed include development of objectives and items, sample design, assessment instruments, field administration, materials processing, and database creation, processing, assessment materials, professional scoring, data transcription systems, editing, data quality control, database products, weighting procedures, and estimation of sampling variance, scaling procedures, data analysis for the various subject area assessments, and the statistical summary of the samples and estimates of proficiencies of U.S. students. A total of 204 data tables and 14 figures are provided. Appendices provide a list of consultants for development of the 1988 NAEP objectives and items, distributions of weight components for the 1988 NAEP samples, contrast codings, and estimated effects for 1988 NAEP conditioning variables, 1988 NAEP derived and composite conditioning variables, revision of 1984 NAEP post-stratification weights for grade 4, age 9 years, and grade 8, age 13 years, 1988 NAEP item response theory parameters, and NAEP reporting subgroups, composite and derived common background variables, and subject-specific composite and derived reporting variables. A glossary of terms, a list of references cited in the text, and an index are included. TJH
