Genetic Programming III John R. Koza,1999 Genetic programming GP is a method for getting a computer to solve a problem by telling it what needs to be done instead of how to do it Koza Bennett Andre and Keane present genetically evolved solutions to dozens of problems of design control classification system identification and computational molecular biology Among the solutions are 14 results competitive with human produced results including 10 rediscoveries of previously patented inventions

Handbook of Computer Animation John Vince,2012-12-06 One of the challenges facing professionals working in computer animation is keeping abreast of the latest developments and future trends some of which are determined by industry where the state of the art is continuously being re defined by the latest computer generated film special effects while others arise from research projects whose results are quickly taken on board by programmers and animators working in industry This handbook will be an invaluable toolkit for programmers technical directors and professionals working in computer animation A wide range of topics are covered including Computer games Evolutionary algorithms Shooting and live action Digital effects Cubic curves and surfaces Subdivision surfaces Rendering and shading Written by a team of experienced practitioners each chapter provides a clear and precise overview of each area reflecting the dynamic and fast moving field of computer animation This is a complete and up to date reference book on the state of the art techniques used in computer animation

Evolutionary Algorithms Alain Petrowski,Sana Ben-Hamida,2017-04-12 Evolutionary algorithms are bio inspired algorithms based on Darwin s theory of evolution They are expected to provide non optimal but good quality solutions to problems whose resolution is impracticable by exact methods In six chapters this book presents the essential knowledge required to efficiently implement evolutionary algorithms Chapter 1 describes a generic evolutionary algorithm as well as the basic operators that compose it Chapter 2 is devoted to the solving of continuous optimization problems without constraint Three leading approaches are described and compared on a set of test functions Chapter 3 considers continuous optimization problems with constraints Various approaches suitable for evolutionary methods are presented Chapter 4 is related to combinatorial optimization It provides a catalog of variation operators to deal with order based problems Chapter 5 introduces the basic notions required to understand the issue of multi objective optimization and a variety of approaches for its application Finally Chapter 6 describes different approaches of genetic programming able to evolve computer programs in the context of machine learning

New Achievements in Evolutionary Computation Peter Korosec,2010-02-01 Evolutionary computation has been widely used in computer science for decades Even though it started as far back as the 1960s with simulated evolution the subject is still evolving During this time new metaheuristic optimization approaches like evolutionary algorithms genetic algorithms swarm intelligence etc were being developed and new fields of usage in artificial intelligence machine learning combinatorial and numerical optimization etc were being explored However even with so much work done novel research into new techniques and new areas of usage is far from over

This book presents some new theoretical as well as practical aspects of evolutionary computation This book will be of great value to undergraduates graduate students researchers in computer science and anyone else with an interest in learning about the latest developments in evolutionary computation Handbook of Bioinspired Algorithms and Applications Stephan Olariu,Albert Y. Zomaya,2005-09-29 The mystique of biologically inspired or bioinspired paradigms is their ability to describe and solve complex relationships from intrinsically very simple initial conditions and with little or no knowledge of the search space Edited by two prominent well respected researchers the Handbook of Bioinspired Algorithms and Applications reveals the **Artificial Intelligence XLI** Max Bramer,Frederic Stahl,2024-11-28 This two volume set LNAI 15446 and LNAI 15447 constitutes the refereed proceedings of the 44th SGAI International Conference on Artificial Intelligence AI 2024 held in Cambridge UK during December 17 19 2024 The 36 full papers and 18 short papers presented in these two volumes were carefully reviewed and selected from 80 submissions Part I includes papers from the Technical stream whereas Part II includes papers from the Application stream These volumes are organized into the following topical sections Part I Neural nets Deep learning Large language models Machine learning Evolutionary and genetic algorithms Knowledge management Short Technical Papers Part II Machine vision Evaluation of AI systems Applications of machine learning Other AI applications Short Application Papers Evolutionary Computation Wellington Santos,2009-10-01 This book presents several recent advances on Evolutionary Computation specially evolution based optimization methods and hybrid algorithms for several applications from optimization and learning to pattern recognition and bioinformatics This book also presents new algorithms based on several analogies and metafores where one of them is based on philosophy specifically on the philosophy of praxis and dialectics In this book it is also presented interesting applications on bioinformatics specially the use of particle swarms to discover gene expression patterns in DNA microarrays Therefore this book features representative work on the field of evolutionary computation and applied sciences The intended audience is graduate undergraduate researchers and anyone who wishes to become familiar with the latest research work on this field **Evolutionary Intelligence S.** Sumathi,T. Hamsapriya,P. Surekha,2008-05-15 This book provides a highly accessible introduction to evolutionary computation It details basic concepts highlights several applications of evolutionary computation and includes solved problems using MATLAB software and C C This book also outlines some ideas on when genetic algorithms and genetic programming should be used The most difficult part of using a genetic algorithm is how to encode the population and the author discusses various ways to do this **Genetic Programming** ,2003 **Genetic Programming III** John R.
