Richard Mayer, 2001. This brief black and white text takes a totally unique approach to the study of Environmental Science. Each major concept is introduced using a case study that relates the topic to real life events that students can relate to and understand. In addition, each case study is further explained with regard to Regional Perspectives from around the world. **Integrated Science** Bill W. Tillery, Eldon D. Enger, Frederick C. Ross, 2001. Integrated Science is an easy to read but substantial introduction to the fundamental behavior of matter and energy in living and nonliving systems. It is intended to serve the needs of non science majors who are required to complete one or more science courses as part of a general or basic studies requirement. It introduces basic concepts and key ideas while providing opportunities for students to learn reasoning skills and a new way of thinking about their environment. No prior work in science is assumed. The language as well as the mathematics is as simple as can be practical for a college level science course. **Instructor's Manual with Test Bank for Miller's Environmental Science** Richard K.
