Assessing the Effects of Fiscal Shocks Craig Burnside,Martin S. Eichenbaum,Jonas D. M. Fisher,2000

This paper investigates the response of real wages and hours worked to an exogenous shock in fiscal policy We identify this shock with the dynamic response of government purchases and tax rates to an exogenous increase in military purchases The fiscal shocks that we isolate are characterized by highly correlated increases in government purchases tax rates and hours worked as well as persistent declines in real wages We assess the ability of standard Real Business Cycle models to account for these facts They can but only under the assumption that marginal income tax rates are constant a standard assumption in the literature Once we abandon this counterfactual assumption RBC models cannot account for the facts We argue that our empirical findings pose a challenge to a wide class of business cycle models
