**Excel Formulas**  
The ability to use formulas is one of the most powerful features of Excel. It allows you to perform calculations on data, and the results are automatically updated when the data changes. This is a key feature of spreadsheets, and it's what makes them so useful for business and personal use.

**Formulas and Functions**  
A formula is an equation that you type into a cell to tell Excel to perform a calculation. A function is a pre-defined formula that you can use in a cell. For example, the SUM function adds up all the numbers in a range of cells.

**Logical Formulas**  
Logical formulas are used to compare values and return a result of either TRUE or FALSE. They are used to control the flow of a spreadsheet, for example, to hide data or to perform calculations only when certain conditions are met.
