

## TEKS Scaffold

TEKS	Student Expectation
5.3(B)	multiply with fluency a three-digit number by a two-digit number using the standard algorithm (2)

**4.4. Number and operations.** The student applies mathematical process standards to develop and use strategies and methods for whole number computations and decimal sums and differences in order to solve problems with efficiency and accuracy. The student is expected to:

**(H) solve with fluency one- and two-step problems involving multiplication and division, including interpreting remainders**

3.4(C)	solve one-step and two-step problems involving multiplication and division within 100 using strategies based on objects, pictorial models, including arrays, area models, and equal groups, properties of operations, or recall of facts (8)
2.6(A)	model, create, and describe contextual multiplication situations in which equivalent sets of concrete objects are joined (2)
2.6(B)	model, create, and describe contextual division situations in which a set of concrete objects is separated into equivalent sets (2)

## Stimulus

Word Problem*	Verbal Description	Chart/Table	Graph
Equation/Expression	Manipulatives	Diagram/Image	Number Line
Base Ten Blocks	Measurement Tool	Formula	Geometric Figures

## Content Builder (see Appendix for Tree Diagram)

- Solve one-step problems involving:
  - multiplication
  - division
- Solve two-step problems involving:
  - multiplication
  - division
  - multiplication and division
- Interpret remainders in division

## Instructional Implications

In conjunction with 4.4(D), as students become more comfortable with the conceptual understanding of multiplication and division, instruction moves to a more abstract representation. Instruction should include one- and two-step problems (e.g., two steps with just multiplication, two steps with just division, one step with multiplication and one step with division).

Students need to interpret and apply the use of the remainder of division problems in different ways (e.g., There are 225 cupcakes. If 8 cupcakes fit on a plate, how many plates will be filled with cupcakes? How many cupcakes will be leftover and not on a plate? How many plates will be needed for all of the cupcakes to fit on plates?).

## Learning from Mistakes

Students may make the following mistakes:

- Trying to apply “key words” to select the appropriate operation instead of understanding the context of the problem\*
- Not recognizing a number sentence and its inverse as being equivalent (e.g., not recognizing  $42 \div 6 = \dots$  is the same thing as  $6 \times \dots = 42$ )
- Struggling with regrouping, such as neglecting to add a regrouped digit when multiplying
- Neglecting to add a zero when multiplying by the tens place in 2-digit by 2-digit multiplication, yielding an incorrect product
- Only solving the first step in a multi-step problem\*
