

Nursing Leadership: Reflection Paper Example Essay

Introduction

Nursing leadership is an essential part of professional practice. Since the curriculum is modeled towards the realization of patient-centered care, the different areas of the care delivery require aspects of leadership. I learned this from the registered bedside nurse leader that I interviewed. I chose her because, after my BSN degree, I intend to be a bedside nurse pending my becoming a nurse manager. I also opted for her, because, as Larsson and Sahlsten (2016) opine, such nurses oversee the completion of patient care and provide safe client services. The fact that I had done my student attachment at the facility allowed me to meet and interact with her during my bedside rotation. She was articulate, well-informed and her decisions were well-grounded in nursing theories, norms, and EBP. I felt that she was a useful resource person whose experiences and leadership will inform my knowledge on bedside patient management. As a result, the purpose of my interview was not only to gain an understanding of nurse management at the bedside but also identify the existing gaps in my training that may impede my future role as a bedside nurse.

Nursing Leadership and Theories

As mentioned earlier, the interviewee had well-grounded knowledge in nursing theories, and her decision was well informed by existing research on her actions. Apparently, her development as a nurse and the subsequent attainment of nurse management position were influenced by transformational leadership. She was always open to suggestions and gave a chance to anyone speaking before interrupting. According to Larsson and Sahlsten (2016), leaders that idealize the above acts portray transformational leadership. Besides, she hinted that she gives her subordinates the necessary instructions and allows them to carry on with patient management, though with close supervision. Research indicates that leaders who exhibit the above leadership styles empower and motivate their juniors towards a shared goal, and promote active participation among the subordinates (Lorber & Savic, 2011). Apparently, her leadership style allowed her to develop a conducive environment for a shared responsibility with other nurses.

Evidence-Based Practice and Other Practice Tenets

The nurse leader affirms that her knowledge in leadership and practice is grounded on the existing evidence bases. She categorically states that her daily activities at the unit entail championing a healthy working environment for the bedside nurses. She does this by structuring work equitably before each shift, promoting dialogue for problem identification and causal analysis, and makes herself available to subordinates and patients throughout the day. In response to her management duties, existing research shows that a conducive working environment provides an atmosphere where nurses deliver safe, and quality patient care (Larsson & Sahstein, 2011; Lewis & Malecha, 2011; Warner et al., 2016). I commend the nurse leader for leveraging on her transformative leadership skills to empower her subordinates to provide safe and quality client care at the bedside.

Even though she works towards establishing a healthy environment at the unit, the nurse leader also
