How and When to Involve Crowds in Scientific Research Marion K. Poetz, Henry Sauermann, 2024-12-09 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com Marion K Poetz and Henry Sauermann provide concise and invaluable instruction for researchers in this informative How to guide Exploring the opportunities and challenges of involving crowds in all stages of the scientific process they outline research strategies that organizers can implement for success Basic and applied research on deception and its detection Wolfgang Ambach, Matthias Gamer, 2014-08-07 Deception is a ubiquitous phenomenon in social interactions and has attracted a significant amount of research during the last decades The majority of studies in this field focused on how deception modulates behavioral autonomic and brain responses and whether these changes can be used to validly identify lies Especially the latter question which historically gave rise to the development of psychophysiological lie detection techniques has been driving research on deception and its detection until today The detection of deception and concealed information in forensic examinations currently constitutes one of the most frequent applications of psychophysiological methods in the field With the increasing use of such methods the techniques for detecting deception have been controversially discussed in the scientific community It has been proposed to shift from the original idea of detecting deception per se to a more indirect approach that allows for determining whether a suspect has specific knowledge of crime related details This so called Concealed Information Test is strongly linked to basic psychological concepts concerning memory attention orienting and response monitoring Although research in this field has intensified with the advancement of neuroimaging techniques such as PET and fMRI in the last decade basic questions on the psychological mechanisms underlying modulatory effects of deception and information concealment on behavioral autonomic and brain responses are still poorly understood This Research Topic brings together contributions from researchers in experimental psychology psychophysiology and neuroscience focusing on the understanding of the broad concept of deception including the detection of concealed information with respect to basic research questions as well as applied issues This Research Topic is mainly composed of original research articles but reviews and papers elaborating on novel methodological approaches have also been included Experimental methods include but are not limited to behavioral autonomic electroencephalographic or brain imaging techniques that allow for revealing relevant facets of deception on a multimodal level While this Research Topic primarily includes laboratory work relevant issues for the field use of such methods are also discussed **The Influence of Internal Barriers on Open Innovation** Pedro de Faria, Florian Noseleit, Bart Los, 2021-03-22 Despite providing us with a good understanding of how firms use certain mechanisms to benefit from open innovation strategies current research provides only limited insights into how barriers internal to the firm may hamper knowledge transfer and limit effective utilization of external knowledge sources The Influence of Internal Barriers on Open Innovation proposes a

dynamic perspective that addresses this gap and aims at stimulating this discussion in two ways First by looking at how the way firms structure their internal innovation activities may unintentionally create barriers to the incorporation of external knowledge Second by reflecting on how internal barriers might be coupled to firm decisions aimed at the optimization of innovation processes like the balance between exploration and exploitation strategies The chapters of this book provide detailed conceptualization and investigation of organizational characteristics and practices that influence internal barriers to open innovation The diverse set of studies described in the chapters of this book will help open innovation scholars to better understand the challenges that firms face when dealing with internal barriers that affect their external knowledge search and knowledge sourcing The chapters in this book were originally published as a special issue of the journal *Industry and Innovation*

Collaborative Networks for a Sustainable World Luis M. Camarinha-Matos, Xavier Boucher, Hamideh Afsarmanesh, 2010-10-02 Collaborative Networks for a Sustainable World Aiming to reach a sustainable world calls for a wider collaboration among multiple stakeholders from different origins as the changes needed for sustainability exceed the capacity and capability of any individual actor In recent years there has been a growing awareness both in the political sphere and in civil society including the business sectors on the importance of sustainability Therefore this is an important and timely research issue not only in terms of systems design but also as an effort to borrow and integrate contributions from different disciplines when designing and governing those systems The discipline of collaborative networks especially which has already emerged in many application sectors shall play a key role in the implementation of effective sustainability strategies PRO VE 2010 focused on sharing knowledge and experiences as well as identifying directions for further research and development in this area The conference discussed models infrastructures support tools and governance principles developed for collaborative networks as important resources to support multi stakeholder sustainable developments Furthermore the challenges of this theme open new research directions for CNs PRO VE 2010 held in St

Dishonest Behavior: From Theory to Practice Guy Hochman, Shahar Ayal, Dan Ariely, 2016-11-17 The rapidly growing field of behavioral ethics shows that dishonest acts are highly prevalent in all walks of life from corruption among politicians through flagrant cases of doping in sports to everyday slips and misdemeanors of ordinary people who nevertheless perceive themselves as highly moral When considered cumulatively these seemingly innocuous and ordinary unethical behaviors cause considerable societal damage and add up to billions of dollars annually Research in behavioral ethics has made tremendous advances in characterizing many contextual and social factors that promote or hinder dishonesty These findings have prompted the development of interventions to curb dishonesty and to help individuals become more committed to ethical standards The current e book includes studies that test and advance current theory and deepen our understanding of the cognitive and physiological processes underlying dishonest behavior discuss possible implications of findings in behavioral ethics research for real life situations document dishonest behavior in the field and or directly examines interventions to reduce it **The**

Indian Journal of Public Administration ,2010 *Behavioral Competencies for Innovation* Sara Bonesso,Laura Cortellazzo,Fabrizio Gerli,2020-05-20 This book represents the first comprehensive investigation of the role of emotional intelligence in promoting innovation in the organizational context Offering emerging insights into the human side of innovation This book highlights how it has become strategically important for firm innovativeness to identify and evaluate those behavioral competencies that enable entrepreneurs and professionals to generate different types of innovation product process marketing organizational and strategic innovation It illustrates a classification of behavioral competencies for innovation and provides empirical evidence collected through the application of the competency based methodology to a sample of entrepreneurs and new product development teams This book provides practical policy and managerial implications on how to develop and evaluate behavioral competencies in the higher education and organizational settings in order to foster individual innovation capacity Information Technology and the Remaking of the University Library Beverly P. Lynch,1995 The Temporal Dynamics of Cognitive Processing Timothy Michael Ellmore,Peter Ford Dominey,John Magnotti,2016-07-26 From our ability to attend to many stimuli occurring in rapid succession to the transformation of memories during a night of sleep cognition occurs over widely varying time scales spanning milliseconds to days and beyond Cognitive processing is often influenced by several behavioral variables as well as nonlinear interactions between multiple neural systems This frequently produces unpredictable patterns of behavior and makes understanding the underlying temporal factors influencing cognition a fruitful area of hypothesis development and scientific inquiry Across two reviews a perspective and twelve original research articles covering the domains of learning memory attention cognitive control and social decision making this research topic sheds new light on the temporal dynamics of cognitive processing **Interfaces Between Language And Cognition** Yury Y. Shtyrov,Andriy Myachykov,Christoph Scheepers,2013-06-28 Cognitive mechanisms underlying linguistic communication do not only rely upon retrieval and processing of linguistic information they also involve constant updating and organizing of this linguistic information in relation with other more general cognitive mechanisms Some existing theoretical models assume such a tight interactive link between domain general and domain specific sources of information in the cognitive organization of the linguistic faculty and during language use Domain specific constraints may include for example grammatical as well as lexical and pragmatic knowledge Domain general constraints comprise processing limitations imposed by the cognitive mechanisms of memory attention learning and social interaction However much of the existing research tends to focus on one or the other of the aforementioned areas while integrative accounts are still rather sparse at present Therefore the aim of this Research Topic of Frontiers in Cognition is to bring together researchers who with in their respective research fields and by using different methodologies represent integrative approaches to the study of language We invite submissions from a wide range of interrelated areas of research cognitive architectures of language aspects of language processing linguistic development bilingualism language embodiment

neuropsychology of linguistic function among others We would like to solicit original research contributions discussing behavioral neurophysiological and computational evidence as well as papers on methodological and or theoretical aspects of the interplay between linguistic and non linguistic cognitive processes **Documentation Abstracts** ,1999 **Indian Science Abstracts** ,2011-03 *Social Computing* Subhasish Dasgupta,2010-01-01 With an increasing accessibility to social networking tools the development of Web 2 0 and the emergence of virtual worlds social computing crosses cultural boundaries to join people in the digital landscape *Social Computing Concepts Methodologies Tools and Applications* uncovers the growing and expanding phenomenon of human behavior social constructs and communication in online environments This multiple volume publication presents the latest research on social change evolving networks media and interaction with technology to offer audiences a comprehensive view of the impact of social computing on the way cultures think act and exchange information **The Globalization of Higher Education** Luc Weber,James J. Duderstadt,2008 The Glion VI Colloquium departed from its customary transatlantic dialogue by broadening participation including university leaders from around the world representing 18 nations and five continents to consider the globalization of higher education The emergence of a global knowledge driven economy is driven by a radically new system for creating wealth that depends upon the creation and application of new knowledge and hence upon advanced education research innovation and entrepreneurial activities Both mature and developing nations are making major investments in building the knowledge infrastructure schools universities research institutes high tech industry cyberinfrastructure public policies and programs necessary to achieve prosperity and security in the knowledge economy In parallel with these trends there is a strong sense that higher education is also in the early stages of globalization both through the increasing mobility of students and faculty and the rapid growth in international partnerships among universities Some even conjecture that we will soon see the emergence of truly global universities which not only intend to compete in the global marketplace for students faculty and resources but also are increasingly willing to define their public purpose in terms of glob al needs such as public health political economic and environmental sustain ability and international development The first part of this volume provides a context for the subsequent discussion of the impact of globalization on the university from the perspective of a university leader a foundation president and an industry executive Part II considers the global strategies of established universities from several nations the United States the United Kingdom Europe Australia Japan and Russia A quite different perspective is provided by the participants in the third part which focuses on strategies for emerging universities and university systems in China Singapore Korea and Brazil Part IV turns to a broader discussion of global competition and cooperation within the context of changing paradigms in higher education with participants from an unusually broad range of institutions including business schools industry scientific academies open universities and technology institutes The final part examines the broader global responsibilities of higher education from the perspective of Europe the Middle East and the United States Publisher ed
