ADDT 2023 Chaoqun Shen, Mohd Fauzi bin Sedon, Jia Li, 2024-01-11 The 2023 2nd International Conference on Art Design and Digital Technology ADDT 2023 was successfully held on September 15-17, 2023 in Xi'an, China. ADDT 2023 created a forum for idea sharing and research exchange, opened up new perspectives in related fields, and broadened the horizons of all participants. In the conference, 100 individuals around the world took part. Divided into three parts, the conference agenda covered keynote speeches, oral presentations, and online Q&A discussions. Firstly, the keynote speakers were each allocated 30-45 minutes to address their speeches. Then, in the oral presentations, the excellent papers we had selected were presented by their authors one by one. We are glad to share with you that we've selected a bunch of high-quality papers from the submissions and compiled them into the proceedings after rigorously reviewing them. These papers feature but are not limited to the following topics: Computer Art, Visual Design, Digital Media, Innovative Technology, etc. All the papers have been checked through rigorous review and processes to meet the requirements of publication. We would like to acknowledge all of those who supported ADDT 2023 and made it a great success. In particular, we would like to thank the European Alliance for Innovation (EAI) for the hard work of all its colleagues in publishing this paper volume. We sincerely hope that the ADDT 2023 turned out to be a forum for excellent discussions that enable new ideas to come about promoting collaborative research.

Design Studies and Intelligence Engineering Valentina Emilia Balas, Qun Wu, 2024-02-15 The discipline of design studies applies various technologies from basic theory to application systems, while intelligence engineering encompasses computer-aided industrial design, human factor design, and greenhouse design, and plays a major part within design science. Intelligence engineering technologies also include topics from theory and application, such as computational technologies, sensing technologies, and video detection. This book presents the proceedings of DSIE2023, the 2023 International Symposium on Design Studies and Intelligence Engineering, held on 28-29 October 2023 in Hangzhou, China. The conference provides a platform for professionals and researchers from industry and academia to present and discuss recent advances in the fields of design studies and intelligence engineering. It also fosters cooperation among the organizations and researchers involved in these overlapping fields and invites internationally renowned professors to further explore these topics in some depth, providing the opportunity for them to discuss the technical presentations with conference participants. In all, 275 submissions were received for the conference, 105 of which were accepted after thorough review by 3 or 4 referees for presentation at the conference and inclusion here. Providing a valuable overview of the latest developments, the book will be of interest to all those working in the fields of design studies and intelligence engineering.
