Language, Culture and Identity - Signs of Life Vera da Silva Sinha, Ana Moreno-Núñez, Zhen Tian, 2020-04-30 The dynamics of language culture and identity are a major focus for many linguists and cognitive and cultural researchers This book explores the inextricable connection that language has with cultural identity and cultural practices with a particular emphasis on how they contribute to shaping personal identity The volume brings together selected peer reviewed papers from the 7th International Conference on Language Culture and Mind with other specially commissioned chapters Like the conference this book aims to enhance mutual understanding among researchers from diverse disciplinary and theoretical perspectives offering a wealth of insights to a wide range of readers on recent culturally oriented cognitive studies of language

The Evolution of the Unconscious Susan Long, 2025-02-12 Drawing on over four decades of professional and academic experience Susan Long explores how the concept of the unconscious has evolved from the nineteenth to the twenty first century showing that it is more than an individual phenomenon but also a group organisational and institutional phenomena Each chapter examines theories that use

the idea of the unconscious first covering the work of Schelling Freud Bion and Lacan After examining traditional psychoanalytic ethos the author takes a look at the mid twentieth century extension of the meaning of the unconscious towards the social field Here she explores three main traditional categories of approaches the Neo Freudians the Frankfurt School and social scientists historians and anthropologists The book also covers the idea of approaching the unconscious from the perspective of the neurosciences as well as its connections with nature showing a broader more cosmic view of the unconscious in nature and the universe Lastly Long looks at how we might understand today s organisations and society through the lens of the changing ideas presented throughout the book Broad sweeping and accessible this book is a valuable resource for organisational psychologists consultants and managers exploring psychoanalytic and socioanalytic approaches as well as those in academic settings wanting to pursue an interest in the unconscious

Criticality as a signature of healthy neural systems: multi-scale experimental and computational studies Paolo Massobrio, Lucilla de Arcangelis, Valentina Pasquale, Henrik Jeldtoft Jensen, Dietmar Plenz, 2015-05-08 Since 2003 when spontaneous activity in cortical slices was first found to follow scale free statistical distributions in size and duration increasing experimental evidences and theoretical models have been reported in the literature supporting the emergence of evidence of scale invariance in the cortex Although strongly debated such results refer to many different in vitro and in vivo preparations awake monkeys anesthetized rats and cats in vitro slices and dissociated cultures suggesting that power law distributions and scale free correlations are a very general and robust feature of cortical activity that has been conserved across species as specific substrate for information storage transmission and processing Equally important is that the features reminiscent of scale invariance and criticality are observed at scale spanning from the level of interacting arrays of neurons all the way up to correlations across the entire brain Thus if we accept that the brain operates near a critical point little is known about the causes and or consequences of a loss of criticality and its relation with brain diseases e g epilepsy The study of how pathogenetical mechanisms are related to the critical non critical behavior of neuronal networks would likely provide new insights into the cellular and synaptic determinants of the emergence of critical like dynamics and structures in neural systems At the same time the relation between the impaired behavior and the disruption of criticality would help clarify its role in normal brain function The main objective of this Research Topic is to investigate the emergence disruption of the emergent critical like states in healthy impaired neural systems

The Life and Correspondence of Arthur Penrhyn Stanley Rowland Edmund Prothero (Baron Ernle), George Granville Bradley, 1893

Under Pressure? Marcel Bradtmöller, Sonja B. Grimm, Astrid J. Nyland, Noa Lavi, 2025-08-07 This open access book gathers different case studies of resilience and coping strategies in hunter gatherer societies who were confronted with natural hazards Joined in this book authors display a range of strategies how people could face natural hazards and climate change how they manage stress at a group or personal level and how they transmit their knowledge about dreadful events and successful responses to later generations Consequently this book is primarily for

a scientific audience focused on hunter gatherers but will also provide insights for those interested in human responses to crisis and change

Cultures of Learning Suresh Babu G.S, Arunima Naithani, 2024-07-05 This book looks at educational institutions and their role as sites of learning in times of moral and political chaos It highlights the erosion of critical pedagogical traditions in universities in India and registers the ongoing responses and struggles as educational experiences This book develops a critical approach by redefining education from the perspective of learning as a political act to experience the complex network of learning activities beyond the confines of educational institutions It also locates caste gender and religious hierarchies in schools and universities in India The book explores the extremely contradictory experiences of academic spaces that have resulted in the development of uncharted sites of learning Being mindful of these multiple strands the authors examine the culture of learning and reflect on the space for critical learning activism dissent and self reflexivity in schools and universities in India The goal of diverse experiences of learning is to derive new meaning to the conceptions of critical pedagogy as a political act for democratising education This transdisciplinary book will be of interest to students and researchers of education sociology history political studies and public policy
