**Focus**, 1978 **Industrial Excellence** Christoph H. Loch, Ludo van der Heyden, Luk N. van Wassenhove, Arnd Huchzermeier, Cedric Escalle, 2013-03-20 What does excellent manufacturing management mean Management texts to date have emphasized that it is above methods such as SPC or TQM a matter of intangibles and culture This book takes the myth out of management excellence it can be learned and practiced First manage the three core processes strategy deployment product and process development and the supply chain And secondly pay

attention to the dimension of management quality direction setting integration and delegation communication participation measurement and employee development This book explains management quality and demonstrates how it is implemented with ten plant tours through world class factories from different industries [Designing Pan-America](#) Robert Alexander González,2023-09-30 Coinciding with the centennial of the Pan American Union now the Organization of American States González explores how nineteenth and twentieth century U S architects and their clients built a visionary Pan America to promote commerce and cultural exchange between United States and Latin America Late in the nineteenth century U S commercial and political interests began eyeing the countries of Latin America as plantations farms and mines to be accessed by new shipping lines and railroads As their desire to dominate commerce and trade in the Western Hemisphere grew these U S interests promoted the concept of Pan Americanism to link the United States and Latin America and called on U S architects to help set the stage for Pan Americanism s development Through international expositions monuments and institution building U S architects translated the concept of a united Pan American sensibility into architectural or built form In the process they also constructed an artificial ideological identity a fictional Pan America peopled with imaginary Pan American citizens the hemispheric loyalists who would support these projects and who were the presumed benefactors of this presumed architecture of unification [Designing Pan America](#) presents the first examination of the architectural expressions of Pan Americanism Concentrating on U S architects and their clients Robert Alexander González demonstrates how they proposed designs reflecting U S presumptions and projections about the relationship between the United States and Latin America This forgotten chapter of American architecture unfolds over the course of a number of international expositions ranging from the North Central and South American Exposition of 1885 1886 in New Orleans to Miami s unrealized Interama fair and San Antonio s HemisFair 68 and encompassing the Pan American Union headquarters building in Washington D C and the creation of the Columbus Memorial Lighthouse in the Dominican Republic [Consumer Reports 2002](#) Consumer Reports,2003-02 **Tournament Approaches to Policy Reform** Clifford F. Zinnes,2010-10-01 While much foreign aid achieves commendable goals some is ineffective In this volume Clifford Zinnes argues that a donor s intrinsic informational limitations on the local context as well as inability to control the progress of interventions mean that lack of success is not rooting in insufficient funding but in maladapted institution designs of interventions that don t foster local ownership He identifies and assesses a newly emerging class of foreign aid delivery that promises to overcome these obstacles The approach is based on prospective inter jurisdictional competition PIJC Beneficiary groups often local level governments supported by their private sector and civil society act as teams and compete against each other under explicit predefined rules and objectives to design and implement interventions under their own aegis to achieve the highest quantitatively measured performance either relative to others tournaments or against a preset benchmark certification Teams that cooperate internally are the likeliest to win the rewards which aside from the longer run benefits of the intervention itself

might include more substantive financial or technical assistance from the sponsor. Since only groups serious about reforming choose to play Zinnes says the incentives generated by the ensuing race to the top competition create local ownership encouraging recipients to draw on their own knowledge. Moreover since all teams that compete and not just those who win donor rewards benefit from their own reform efforts he argues that this approach can leverage aid resources more than a conventional bilateral aid agreement. Zinnes presents a dozen recent applications of the approach including those sponsored by the World Bank USAID the United Nations the Ford Foundation and others. He also recommends improvements and ways to scale up PIJC based projects in applications ranging from protecting the environment and reducing red tap.
