Transition Point: From Steam to the Singularity

Sean A. Culey,2018-11-06 We live in disruptive times The world is changing faster than ever before leaving people dazed
businesses struggling economies floundering and societies fracturing But why Transition Point is the result of over five years
of research to establish the answer a breathtaking tale of freedom unintended consequences and disruptive technologies that
starts 1000 years ago and ends up in the second half of the 21st Century Starting with an examination into the drivers of
technological change and the social economic and political factors that both enable or suppress it Transition Point explains
why industrialisation happened where and when it did why progress comes in waves and why the technologies in the current
wave such as robotics blockchain and AI are likely to be the most disruptive of all It then addresses the million dollar
question what s next What impact will this wave have on our businesses our economies and most importantly on our society
Culey explores how our current trajectory could result in a new golden age but also how it is just as likely to result in a
digital dictatorship of compliance and constant surveillance Finally he explains why we may soon see Homo sapiens role as
the dominant species come to an end As Klaus Schwab founder of the World Economic Forum stated We stand on the brink of
a technological revolution that will fundamentally alter the way we live work and relate to one another In its scale scope and
complexity the transformation will be unlike anything humankind has experienced before Transition Point explains why this
is happening what it means and why the decisions we make now will prove to be critical *Nebraska History News* ,2014
