

- Select **Fit System to View** from the **View** menu (or press the space bar) to fit the diagram to the view.

- Select **Normal** from the **View** menu to view the diagram at actual size.

By default, Simulink fits a block diagram to view when you open the diagram either in the model browser's content pane or in a separate window. If you change a diagram's zoom setting, Simulink saves the setting when you close the diagram and restores the setting the next time you open the diagram. If you want to restore the default behavior, choose **Fit System to View** from the **View** menu the next time you open the diagram.

**Selecting Objects**

Many model building actions, such as copying a block or deleting a line, require that you first select one or more blocks and lines (objects).

**Selecting One Object**

To select an object, click on it. Small black square "handles" appear at the corners of a selected block and near the end points of a selected line. For example, the figure below shows a selected SineWave block and a selected line:

**Selecting More than One Object**

You can select more than one object either by selecting objects one at a time, by selecting objects located near each other using a bounding box, or by selecting the entire model.

**Selecting Multiple Objects One at a Time**

To select more than one object by selecting each object individually, hold down the **Shift** key and click on each object to be selected. To deselect a selected object, click on the object again while holding down the **Shift** key.

**Selecting Multiple Objects Using a Bounding Box**

An easy way to select more than one object in the same area of the window is to draw a bounding box around the objects.

**1** Define the starting corner of a bounding box by positioning the pointer at one corner of the box, then pressing and holding down the mouse button. Notice the shape of the cursor.

**2** Drag the pointer to the opposite corner of the box. A dotted rectangle encloses the selected blocks and lines.
