Technical Abstract Bulletin ,1979 *SIMD Programming Manual for Linux and Windows* Paul Cockshott,Kenneth Renfrew,2013-03-09 A number of widely used contemporary processors have instruction set extensions for improved performance in multi media applications The aim is to allow operations to proceed on multiple pixels each clock cycle Such instruction sets have been incorporated both in specialist DSPchips such as the Texas C62xx Texas Instruments 1998 and in general purpose CPU chips like the Intel IA32 Intel 2000 or the AMD K6 Advanced Micro Devices 1999 These instruction set extensions are typically based on the Single Instruction stream Multiple Data stream SIMD model in which a single instruction causes the same mathematical operation to be carried out on several operands or pairs of operands at the same time The level of parallelism supported ranges from two floating point operations at a time on the AMD K6 architecture to 16 byte operations at a time on the Intel P4 architecture Whereas processor architectures are moving towards greater levels of parallelism the most widely used programming languages such as C Java and Delphi are structured around a model of computation in which operations takeplace on a single value at a time This was appropriate when processors worked this way but has become an impediment to programmers seeking to make use of the performance offered by multi media instruction sets The introduction of SIMD instruction sets Peleg et al **George Programming Manual** Loretta Kassel,1959 GEORGE is an automatic high speed electronic digital computer designed and constructed by ANL Operating features of GEORGE are described and a practical set of instructions is given that will enable a prospective user to construct codes operate the machine and its auxiliary equipment use the basic routines available in the routine library and decide whether a particular problem is suitable on the basis of capacity speeds and auxiliary equipment Settlement Options, the Programming Manual Flitcraft, inc,1958 Catalog of Copyright Entries.
