The Alphabet of Lines in Technical Drawing

Lines in technical drawings are part of a specialized graphic language that is standardized throughout industry. Each type of line has a very precise symbolic meaning. Correct usage of this "alphabet of lines" is essential whether you use traditional drafting methods or CAD.

Line weight is the thickness of the line.

Construction lines and guide lines are very light, easily erased lines used to block in the main layout.

Visible lines are the edges or "outlines" of an object. They are drawn as solid lines with a thick/heavy weight.

All other lines contrast with the visible lines by having either a thinner weight and/or a combination of dashes.
