The Wink!

The big day was here. Rosa was in the school
10 orchestra and tonight was the winter concert. It was
19 the first time she would play the piano in front of
30 an audience.
32 Rosa was worried all day in school. When she got
42 home she had butterflies in her stomach. She was still
52 scared when she left for the concert. Rosa went
61 backstage and peeked out from behind the curtain and
70 watched her friend Sam play his horn. Sam never made
80 a mistake. He looked fine. Then Rosa saw her parents
90 in the third row. Her father caught her eye and winked.
101 Suddenly, Rosa knew she could do it. She would
110 pretend she was playing for just her mom and dad.
120 Rosa stepped onto the stage. She played her song well.
130 When it was over, Rosa grinned. She winked at
139 her parents and ran off the stage. Rosa's stage fright
149 was over.

First Second Grade Fluency Passages:

Handbook of Response to Intervention Shane R. Jimerson, Matthew K. Burns, Amanda VanDerHeyden, 2007-08-14

Until now practitioners have had access to few detailed descriptions of RTI methods and the effective role they can play in special education. The Handbook of Response to Intervention fills this critical information gap. In this comprehensive volume, more than 90 expert scholars and practitioners provide a guide to the essentials of RTI assessment and identification, as well as research-based interventions for improving students' reading, writing, oral, and math skills. JEBPS Vol 6-N1 Journal of Evidence-Based Practices for Schools, 2005-02-15. The Journal of Evidence-Based Practices for Schools is a leader in publishing research-to-practice articles for educators and school psychologists. The mission of this journal is to positively influence the daily practice of school-based professionals through studies demonstrating successful research-based practices in educational settings. As a result, the editors are committed to publishing articles with an eye toward improving student performance and outcomes by advancing psychological and educational practices in the schools. They seek articles using non-technical language that 1) outline an evidence-based practice, 2) describe the literature supporting the effectiveness and theoretical underpinnings of the practice, 3) describe the findings of a study in which the practice was implemented in an educational setting, and 4) provide readers with information they need to implement the practice in their own schools in a section entitled Implementation Guidelines. The Journal of Evidence-Based Practices for Schools differs from other scholarly journals in that it features articles that demonstrate empirically based procedures for readers to apply the practice in their setting.

A Measure of Success Christine A. Espin, Kristen L. McMaster, Susan Rose, Miya Miura Wayman, 2012-08-07

Simple in concept, far-reaching in implementation, Curriculum-Based Measurement (CBM) was developed in the 1980s as an efficient way to assess the progress of struggling students, including those with disabilities. Today, there are few areas of special education policy and practice that have not been influenced by CBM progress monitoring. The impact of CBM is reflected in recent education reforms that emphasize improvements in assessment and data-based decision making. Gathering an international group of leading researchers and practitioners, *A Measure of Success* provides a comprehensive picture of the past, present, and possible future of CBM progress monitoring. The book will be instrumental for researchers and practitioners in both general and special education, particularly those involved in the rapidly growing Response to Intervention (RTI) approach, an approach used to determine the performance and placement of students with learning difficulties. *A Measure of Success* presents a nuanced examination of CBM progress monitoring in reading, math, and content area learning to assess students at all levels, from early childhood to secondary school, and with a wide range of abilities, from high and low incidence disabilities to no disabilities. This study also evaluates how the approach has affected instructional practices, teacher training, psychology, and school psychology, educational policy, and research in the United States and beyond. Timely and unique, this volume will interest anyone in education who wants to harness the potential advantage of progress
