Fishy Business J J Murray,2025-01-07 When most people think about a fishing guide they re pretty envious about the lifestyle of a fishing guide Compared to a person who sits at a desk for a daily nine to five time period and stares forlornly out the window looking at the great outdoors the fishing guides office is the great outdoors A fishing guide seems like the perfect job Outside in the fresh air always on the water fishing every day and never locked in the confines of a building Plus you actually get paid for doing that task Can t get any better than that lifestyle Assumption about an occupation can often be misleading and this is certainly true about a fishing guides occupation Fishing guides work long hours and perform a lot of unseen tasks that add up to even more hours There are other factors as well including dealing with adverse weather equipment maintenance and malfunctions and the complexity of human interaction that occurs in close quarters At the end of the day it s not easy being a fishing guide and it s a challenging occupation that beats up a lot of the people that participate in it Fishing guides see and experience a lot on a daily basis Guides have stories and lots of them Stories that consist of adventure excitement bewilderment disappointment frustration and humor Within these pages are candid stories told by many different fishing guides Stories that will captivate the reader and adjust perception about what its really like to be a fishing guide

Petrossian,2019-05-17 This book examines the global local and specific environmental factors that facilitate illegal fishing and proposes effective ways to reduce the opportunities and incentives that threaten the existence of the world s fish Humans are deeply dependent on fishing globally fish comprise 15 percent of the protein intake for approximately 3 billion people and 8 percent of the global population depends on the fishing industry as their livelihood The global fishing industry is plagued by illegal fishing however and many highly commercial species such as cod tuna orange roughly and swordfish are extremely vulnerable Through criminological analysis The Last Fish Swimming emphasizes the importance of looking at specific environmental factors that make illegal fishing possible It examines such factors as proximity to known ports where illegally caught fish can be landed without inspection i e ports of convenience fisheries monitoring control and surveillance efforts formal surveillance and resource attractiveness in 53 countries that altogether represent 96 percent of the world s fish catch The book calls upon the global community to address the illegal depletion of the world s fish stock and other similar threats to the world s food supply and natural environment in order to ensure the sustainability of the planet s fish and continuation of the legal fishing industry for generations to come Aquarium Fish Magazine ,2002 Sounds of Silence Ildir Peçi,2006 The subject of this thesis is the relationship between administrative supervision criminal investigation and the nemo tenetur principle The point of departure is the distinction made in Dutch law and doctrine between administrative supervision and criminal investigation Such a distinction is often made in the area of the enforcement of socio economic regulatory legislation where supervision and investigation are perceived as isolated phases of the regulatory process The supervision phase gives way to the investigation phase as soon as a suspicion that a criminal offence has been committed arises Initially one of the main arguments in favour of the distinction seems to have been that a citizen s obligation to provide information to the supervising authorities conflicts with a suspect s right to remain silent during the investigation phase Therefore the central question of this study is whether it is necessary to have a strict demarcation between administrative supervision and criminal investigation in order to better respect the nemo tenetur principle
