Arts Integration in Diverse K-5 Classrooms Liane Brouillette, 2019-07-12 Partnerships are now pervasive in global education and development but are they creating equitable cooperative and positive relationships Through case studies of prominent multistakeholder partnerships including the Education Cannot Wait Fund and Global Partnership for Education as well as a comprehensive analysis of the global education network this book exposes clear power imbalances that persist in the international aid environment The author reveals how actors and organizations from high income countries continue to wield disproportionate influence while the private sector holds a growing degree of authority in public policy circles In light of such evidence this book questions if partnerships truly ameliorate power asymmetries or if they instead reproduce the precise inequities they are meant to eliminate This text offers a thoughtful look into both theoretical and practical issues surrounding arts integration as a viable strategy for increasing students achievement and access to higher education and career pathways It is especially timely in the context of a widespread focus on equity and inclusion as teachers are facing more diversity in the classroom than ever before

Kristen Greer Paglia CEO P S ARTS This book offering a rich buffet of art based activities grounded in critical ideas about teaching and learning includes topics as oral language development visual thinking strategies making meaning of narrative and informational texts and expression through narrative and informational writing An excellent guide to teachers aspiring to integrate the arts into their curriculum it is both a delightful and useful read

Solsken, 1993 This is the first in depth study of gender issues in early literacy learning It provides vivid portraits of the difficulties that both boys and girls experience in learning to read and write at home and in classrooms due to gendered divisions of labor in families and schools The portraits are based on data from a three year ethnographic study in which learning biographies were constructed for thirteen children from their entry into kindergarten until the completion of second grade The biographies show that in learning to read and write children construct gendered identities and negotiate their social relations with parents siblings teachers and peers Even in supportive families and progressive classrooms

children face difficulties in literacy learning as a result of family and classroom practices organizing literacy on the dimensions of male female and work play The result is often the unwitting perpetuation of traditional gender roles in families schools and the larger society This account of early literacy learning links the personal and social meaning of literacy in children s everyday lives with the larger cultural and political significance of gender The theoretical arguments and questions raised in the book challenge prevailing psychological and sociocultural models of literacy learning and set the agenda for future research on literacy and gender
