

MATHS WITH MANIPULATIVES: ATTRIBUTE BLOCKS

Paul Swan

Figure 1

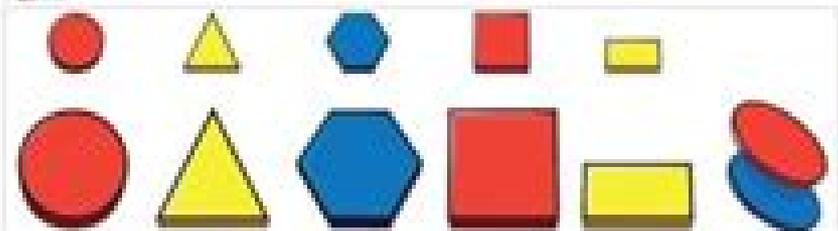

Figure 2

Attribute blocks are often combined with Pattern Blocks and Cuisinart® Rods. When mixed together in a clear plastic container, Pattern Blocks come in 30 sets that consist of 12 sets placed inside an often-reusable Ziploc® bag. Pattern Blocks come in five pieces: Yellow Hexagon, Red Trapezoid, Blue and Tan Rhombus, Green Triangle and Orange Square (see Figure 1).

Attribute Blocks are plastic shapes that come in:

- Two flat legs or rods
- Two flat bases: flat or thin
- Three colours: red, blue or yellow
- Five shapes: square, sphere, rectangle, trapezoid and circle (see Figure 2).

The fact that there is a yellow trapezoid in the Pattern Block set and the Attribute Block set covers part of the confusion.

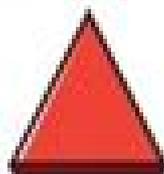

MANAGING THE MATERIALS

The size, thickness, colour and shape represent the block's attributes, hence the name Attribute Blocks.

Figure 3

With just four words, you can describe a single block. A large block that is red would look like this:

Here an individual piece makes up a set of Attribute Blocks (1 × 2 × 1 × 1). Each block is different, so I suggest the original packaging is kept and the pieces packed away at the end of each session (see Figure 3). Also, I would buy an extra set, so you have spare available to top up one, two sets.

(Block numbers on page 14)

MATHS WITH MANIPULATIVES: ATTRIBUTE BLOCKS (CONT.)

SAMPLE ACTIVITIES

FOR A PEEK

The blocks are placed on the table. If you don't like the name of glasses on the desk, place a white card on the desk. It reads: 'The name follows the "long face" and makes a good background if the blocks are photographed.'

The person chooses a block and the other person asks questions to bring out their words. Consider how the block's attributes are connected to the word 'leaf' - the white block most near of the others in position.

SPIN AND FIND

Use an Attribute Spinner or another that is spun up a piece (see Figure 4).

Pick up a piece and only a note the spinner features may complete the story according to using the features of the spinner (see section on). A small Attribute Block Spinner may be found at [www.mathworksheetsland.com](http://www.mathworksheetsland.com/attribute-block-spinner.html).

NOT SPINNING

Randomly the word sets a story generated from their word in mathematics. For the word 'leaf' the story could read: 'The colour of the spinner. For example, the piece is red, blue, and black, and yellow and red is a circle. The name there will be more possible answers. The piece could be small, big, and so on, enough space, rectangle, triangle. One space out all given words (not to be thick) and the word 'leaf' does not have to be used in those of each part in the spinner.

PLAY SPERDUCKE BOOKS

This is a game for four players. The blocks are placed on the table and mixed around.

The talking version

Three players draw their card and the remaining player 'reads a story'. The three players work with cooperatively to find the other pieces without talking.

Figure 4

The students are allowed to move and set pieces. When they follow they find the missing piece, then can only see five words. The staff will draw on you in a specific or set goals.

Talking version

Three sets manipulate the blocks talking questions to check the student is with 'yes' or 'no'. Allowing students to see the spinner to help track provides visual support to enable students who get 'lost' to see in the game.

LANGUAGE AND LOGIC

Students draw one writing card to form their diagrams. Two diagrams are named after John Snow (1813 – 1858), a mathematician and logician.

Blocks placed in the intersection of two circles mean that two criteria or attributes, that is red and triangle, making a third attribute means that the intersection of all three criteria means that three criteria will need to be met (see Figure 7). The link between language and logic becomes clear.

Consider how students work – how correct words represent work.

Figure 7

SYMBOLS AND LANGUAGE

Students may use different writing systems to describe the relationship between pieces. See Figure 8.

Guide For Attribute Blocks
