

Middle Level Lesson Plan for Math class – Secondary Education, Mathematics

Teacher(s): M'Call Schaefer	Subject/Grade Level: Math 7 th Grade Intervention	Topic/Unit of Study: Quadrants/Reflection
<p>Objectives:(What will students know and be able to do at the end of this lesson?) Students will be able to place points in all 4 quadrants of a graph. Students will be able to identify and graph different shapes representing reflections along the x and y-axis.</p>		
<p>TEKS (Content): 7.7 locate and name points on a coordinate plane using ordered pairs of integers 7.7B graph reflections across the horizontal or vertical axis and graph translations on a coordinate plane TAC (Technology Content): 126.15 4C collect and analyze data to identify solutions and make informed decisions</p>		<p>Academic Vocabulary:(What terms are fundamental for understanding this lesson? How will you introduce them?) Quadrant - review activities on the smart board X and y axis - review activities on the smart board Reflection - provide examples of step by step modeling on the smart board and have the students interact</p>
<p>Assessment/Rubrics:(Must relate to lesson objective. What will students do to demonstrate what they have learned? How will you know students have achieved the stated objective?) Students will prove their understanding by working with their group to place the reflected shapes in the appropriate spot on the graph posters. The students will have to explain to me why they placed the new shape in each quadrant.</p>		
<p>Opening:(state objectives, connect to previous learning, and make relevant to real life). I will have a slide on the smartboard that shows the objectives before I begin. I will review the 4 quadrants of a graph by using the "C" on the smart board along with how to graph a point. I will have the students walk up to the board and drag the points into the appropriate quadrant. I will then lead into the reflection part of the lesson by using the Frayer model</p>		
<p>Instructional Input Teacher Modeling/Input (What will you say/do to show students what is expected?)</p>	<p>Teacher will: I will review quadrants of a graph on the smart board while asking the students review questions such as "Which quadrant does (8,3) belong to?" I will have the students come up to the smart board and drag different points into the correct quadrant. I will base my pace throughout the lesson according to the student's responses. I will show the Frayer model on the smart board to introduce and describe reflections on a graph. I will ask the students to tell me which ones are examples of a reflection and which ones are not. I will then demonstrate how shapes can be reflected along both the x and y-axis by providing step-by-step instructions while modeling 2 examples. This will show the newly reflected shapes.</p>	<p>Student will: The students will provide responses to my review questions about quadrants. They will provide answers such as "Quadrant 1, Quadrant 4." Then they will come forward to the smart board and drag coordinate points to the appropriate quadrant. During the Frayer model, the students will tell me, which of the following are examples of a reflection and which ones are not.</p>
	<p>Co-Teaching Strategy/Differentiation (Identify which co-teaching model, if any, will be used. How will you differentiate the instruction for students who have special needs? How will you help these students meet or exceed the standards?) I will keep the students highly involved by calling on different people to come up to the board and drag different coordinate points into the appropriate quadrant. If I see the students struggling I will better explain the concept. I will ask Mr. Villarreal if there is</p>
