## The Problem

Users are frustrated by the difficulty of finding the right product for their needs. They're looking for a way to get more targeted offers, but they don't know where to start — and that's not just a problem for them, it's also a problem for businesses who want to grow and innovate.

## The Proposed Solution

A new product that uses machine learning to recommend the best products for users based on their needs and interests. An AI-powered shopping assistant that provides users with personalized recommendations based on their needs and interests.

We believe that the answer lies in an algorithm that can analyze billions of data points on demand, automatically identifying what products users want based on their past buying behavior. We call this product "Velxus" and we plan to launch it in 2020.

Velxus will help users find exactly what they need without having to search or browse through endless categories. It will also provide businesses with a new way to market products and services—by using predictive analytics to identify the best way to reach their target audience.

## The Opportunity

The potential to increase conversion rates by helping customers find the right product at the right time.

## The Value

Velxus will make life easier for both users and businesses by providing them with targeted offers based on their specific needs and preferences; it will also help companies grow by making it easier for them to target new customers through the use of machine learning algorithms.
