

FOR REFERENCE ONLY

HAYWARD HIGH PERFORMANCE PUMP INSTALLATION AND OPERATING INSTRUCTIONS

Power-Flo UN SERIES

Your Hayward centrifugal pump has been quality-built and engineered to give you efficient, dependable service. Additionally, it may be equipped with optional union connectors to make installation and future service easier.

The advanced design permits use of either single or dual speed motors and reduces operation and maintenance to simple, common-sense procedures.

GENERAL TIPS ON PUMP INSTALLATION

The Power-Flo UN pump must be installed below water level. For best pump performance, locate the system below the pool water line as close to the tub as possible. Make sure suction joints are tight. Suction pipe should be as large or larger than discharge pipe.

Damp, non-ventilated locations should be avoided. Motors require free circulation of air to aid in cooling.

Insure that the electrical supply available agrees with the motor's voltage, phase and cycle, and that wire size is adequate for the HP (KW) rating and distance from power source. Motor must always be properly grounded. If cord is connected, use a properly grounded outlet. Electrical circuits must be protected by proper size ground fault circuit interrupter (GFCI) as required by applicable electrical codes. All electrical wiring must be performed by qualified personnel, and must conform to local codes and regulations.

MAINTENANCE

1. Hayward pumps have self-lubricating motor bearing and shaft seals. No lubrication is necessary.
2. Keep motor clean. Insure air vents are free from obstruction.
3. Occasionally, shaft seals must be replaced, due to wear or damage. See instructions.

STARTING INSTRUCTIONS

Be sure water can move freely to and from the pump inlet and outlet. Never operate the pump without water. Water acts as a coolant and lubricant for the mechanical shaft seal.

Turn on pump. If pump will not start, see TROUBLE SHOOTING GUIDE on back page. Refer to tub manufacturer's instructions.

NOTE: ANSI/NSPI-4 Article V, standard for above-ground and on-ground pools, advises that components such as the filtration system, pumps and heater be positioned so as to prevent their being used as a means of access to the pool by young children.

CAUTION: All suction and discharge lines must be open when starting the system. Failure to do so could cause severe personal injury and/or property damage.

STORAGE/WINTERIZING

Pump and motor must be protected from freezing. If freezing temperatures are expected, be sure all water has been drained from tub, piping and pump. Shut off all electric power at circuit breaker or main service panel.
