Emergency

Emergency department waiting times for both category 1 and 2 women were on the rise in the last quarter of 2021. These were a 22.5% decrease in the waiting time last year. But in 2022 Q1, there is a 74.5% decrease, and we are on our way to exceed the target by the end of the year. While we decrease the emergency triage, the patients did not come in times, which led to a delay in their treatment. However, some volunteers assisted the patients to respect the time frame and get treated.

Women in the remote areas of Honduras stop treatment due to unavailability of services in their areas. But we are working on increasing progress among them, including:

- Surgery admission rate increased in the day time.
- Category 1 and 2 women were admitted in an emergency within five minutes.
- We had over 75,000 cases of outpatient services.
