## **Life Science Caps 2014 Grade12:**

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation Zilungile Lungi Sosibo, Eunice Ivala, 2021-09-07 Higher education in post-apartheid South Africa was always likely to attract academic interest, and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community (SADC) region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines, from African/African American and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators, and policy makers working in higher education and anyone else with a stake in managing cultural diversity in education.

*Teaching and Learning for Change* Ingrid Schudel, Zintle Songqwaru, Sirkka Tshiningayamwe, Heila Lotz-Sisitka, 2021 Like many national curricula around the world, South Africa's curriculum is rich in environment and sustainability content. Despite this, environmental teaching and learning can be challenging for educators. This comes at a time when Sustainable Development Goal 4 via Target 4.7 requires governments to integrate Education for Sustainable Development into national education systems. *Teaching and Learning for Change* is an exploration of how teachers and teacher educators engage environment and sustainability content, knowledge, methods, and assessment practices: an exposition of quality education processes in support of ecological and social justice and sustainability. The chapters evolve from a ten-year research programme led out of the DSI/NRF SARChI Chair in Global Change and Social Learning Systems, working with national partners in the Fundisa for Change programme and the UNESCO Sustainability Starts with Teachers programme. They show the integration of education for sustainable development in teacher professional development and curricula in schools in South Africa. They reveal how

university based researchers teachers and teacher educators have made theoretically and contextually reasoned choices about their lives and their teaching in response to calls for a more sustainable world in which education must play a role Teaching and Learning for Change will be of interest to education policymakers in government advisors and educators in educational and environmental departments NGOs and other institutions It will also be of interest to teacher educators teachers and researchers in education more generally and environment and sustainability education specifically

Education in a New South Africa Robert J. Balfour,2015-09-24 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education International Education Reform and Language Education Future-proofing STEAME education in South Africa Rajendran Govender,Josef de Beer,Rouaan Maarman,Rajendra Chetty,2025-02-28 This book aims to contribute to the discourse of finding innovative solutions to the myriad of challenges facing science education in South Africa The book positions itself in the multi disciplinary focus on Science Technology Engineering Arts Mathematics and Entrepreneurship STEAME education rather than the traditional narrow focus on Science Technology Engineering and Mathematics STEM The chapters in the book explore the challenges and opportunities facing STEAME education in a complex 21st century and at the advent of a society with a strong artificial intelligence component in its DNA The leitmotif of the book is how engaging pedagogies could be utilised in the classroom to enhance self directed learning a sine qua non to future proof South Africa s science and technological advancement This is a book written by scholars for scholars Its target audience includes academics and researchers in the field of science education and scholars engaged with innovative teaching pedagogies particularly approaches that would enhance the achievement of learners in disadvantaged contexts The chapters in the book although eclectic in approach all contribute to the central theme of the book Most of the chapters lean on textual analyses literature reviews or concept papers which disclose new ideas before full validation Annual Report Mpumalanga (South Africa).
