**EU Global Strategy and Human Security** Mary Kaldor, Iavor Rangelov, Sabine Selchow, 2018-04-17 This volume examines the EU's Global Strategy in relation to human security approaches to conflict. Contemporary conflicts are best understood as a social condition in which armed groups mobilise sectarian and fundamentalist sentiments and construct a predatory economy through which they enrich themselves at the expense of ordinary citizens. This volume provides a timely contribution to debates over the role of the EU on the global stage and its contribution to peace and security at a time when these discussions are reinvigorated by the adoption of the EU Global Strategy. It discusses the significance of the Strategic Review and the Global Strategy for the re-articulation of EU conflict prevention, crisis management, peacebuilding and development policies in the next few years. It also addresses the key issues facing EU security in the 21st century, including the conflicts in Ukraine, Libya and Syria, border security, cyber security and the role of the private security sector. The book concludes by proposing that the EU adopts a second generation human security approach to conflicts as an alternative to geopolitics or the War on Terror, taking forward the principles of human security and adapting them to 21st century realities. This book will be of interest to students of human security, European foreign and security policy, peace and conflict studies, global governance and IR in general.

### **Imperative of Economic Growth in the Eurozone: Competitiveness, Capital Flows and Structural Reforms**

Lubor Lacina, Antonin Rusek, 2017-11-30 European economic recovery appears to be taking hold. So is the European crisis over. The acute phase of the crisis passed, however a number of medium and long term issues remain. The policies of internal devaluations are working, albeit slowly, to restore competitiveness in the countries most affected by the crisis. However, growth remains at best sluggish. The medium and long term outlook remains highly uncertain, fomenting social tensions and endangering political stability. The restoration of economic dynamism is increasingly perceived as the answer to the question of the European future, economically, politically and socially. There is a broad consensus that dynamic structural reforms and the restoration of competitiveness at the level of the global economy are key answers to current European challenges. However, whatever the form these may take, the transfer of resources is implicit and seemingly necessary to underpin the current structure of the eurozone. This indeed raises the question of governance, both fiscal and monetary. After all, the provision

of resources implies an allocation and it is hard to imagine that resources will be provided to the common pool unless the providers have some say with respect to allocation And that requires some form of common i e centralized decision making procedures in all likelihood exceeding the common understanding of the *acquis communautaire* as it exists today i e some form of the effective political arrangement In this context the basic idea which connects all contributions in this volume is the analysis of the problems which affected the Eurozone in the past decade and the challenges and dilemmas the Eurozone will face in the coming years

**The Empirical and Institutional Dimensions of Smart Specialisation** Philip McCann, Frank van Oort, John Goddard, 2016-11-25 *Smart specialisation* is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context The different technologies skills profiles business activities institutions and sectors which reflect a region s economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region s linkages with broader global value chains Yet the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature *The Empirical and Institutional Dimensions of Smart Specialisation* draws together some of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives The quantitative analysis examines the nature of the diversification processes undertaken by

regions and the interplay between the chosen local regional development priorities and the wider global value chain impacts of these choices Meanwhile the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a workable set of policy settings The book is aimed both at academic researchers interested in the interface between economic geography and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local city regional or national levels
