Life Science P2014 November 2limpopo:

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Amazing Feats of Environmental Engineering Carol Hand, 2014-08-01 Engineers design our modern world. They combine science and technology to create incredible vehicles, structures, and objects. This title examines amazing feats of environmental engineering. Engaging text explores projects that supply water to impoverished areas, structures in the Netherlands that hold back the Atlantic Ocean, and the cleanup of contaminated areas. It also examines the engineers who made these projects a reality and traces the history of the discipline. Relevant sidebars, stunning photos, and a glossary aid readers' understanding of the topic. A hands-on project and career planning chart give readers a sense of what it takes to become an engineer. Additional features include a table of contents, a selected bibliography, source notes, and an index plus essential facts about each featured feat of engineering. Aligned to Common Core standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

[The Emerging Policy for Green Economy and Social Development in Limpopo, South Africa](#) Agnes Musyoki, 2012 This paper evaluates the emerging green economy in South Africa using ideas from the concept of sustainable rural livelihoods, which are intimately connected to ecological services in many developing countries. It finds that African communities and governments are prioritising green economy for job creation, poverty alleviation, and reducing inequalities while addressing global environmental concerns. What remains problematic, however, is how these objectives are to be achieved. The paper argues that one of the key challenges in South Africa is the gap between policy and implementation of sustainable development, the Millennium Development Goals, and other globally driven initiatives. The paper emphasises that green economy policy needs to consider poverty reduction and women's empowerment in order to promote rural sustainable development. Publisher description.

Pesticides Marcelo L. Larramendy, Sonia Soloneski, 2019-07-17 The book *Pesticides: Use and Misuse and their Impact in the Environment* contains relevant information on diverse pesticides encountered in both anthropogenic and natural environments. This book provides valuable information

about the toxicity of several agrochemicals that can negatively influence the health of humans and ecosystems

Spatial Approaches in African Archaeology Cameron Gokee, Carla Klehm, 2023-01-01 This book explores the interplay between African archaeology and geospatial methods from three broad perspectives First several contributors examine the technical possibilities and limits of using satellite imagery to detect archaeological sites and model their physical environs A second perspective is the integration of new geospatial data and methods into site and landscape scale analyses to better address questions about social organization and subjective experience in African pasts A final perspective considers the interplay between geospatial technologies and community archaeology in Africa Recognizing that GIS and RS supersede traditional divisions in African archaeology such as different periods geographic regions and theoretical orientations the chapters aim to be widely applicable Arranged by methodological emphasis the case studies move from technical discussions of specific geospatial tools to general applications for addressing specific sociohistorical topics Each chapter clearly explains the links between their archaeological questions and analytical methods as well as how their results advance our understanding of African pasts and heritage resources Many of the chapters can serve as learning models for archaeologists who are new to GIS or curious about its applications to their work Others represent recent advances in geospatial applications of greater interest to more seasoned GIS practitioners demonstrating the potential for African scholarship to contribute to methodological innovations This book is of interest to students and researchers of African and historical archaeology and anthropology Previously published in African Archaeological Review Volume 37 issue 1 March 2020
