The Oxford Handbook of Moral Development Lene Arnett Jensen, 2020-01-24 The nature of people's moral lives, the similarities and differences in the moral concepts of individuals and groups, and how these concepts emerge in the course of human development are topics of perennial interest. In recent years, the field of moral development has turned from a focus on a limited set of theories to a refreshingly vast array of research questions and methods. This handbook offers a comprehensive international and up-to-date review of this research on moral development. Drawing together the work of over 90 authors hailing from diverse disciplines such as anthropology, education, human development, psychology, and sociology, the handbook reflects the dynamic nature of the field. Across more than 40 chapters, this handbook opens the door to a broad view of moral motives and behaviors, ontogeny and developmental pathways, and contexts that children, adolescents, and adults experience with respect to morality. It offers a comprehensive and timely tour of the field of moral development.

The Life Cycle of Clusters Dirk Fornahl, Robert Hassink, 2017-04-28 One size fits all cluster policies have been rightly criticized in the literature. One promising approach is to focus cluster policies on the specific needs of firms depending on the stage of development: emergence, growth, sustainment, or decline. Their cluster is in. In this highly insightful book, these stage-specific cluster policies are analysed and evaluated. Moreover, several chapters also focus on smart specialization policies to promote regional development by taking into account the emergence and adaptation of clusters and industries.
