

GLOBAL TRENDS 2030: AN OVERVIEW

MEGATRENDS

Individual Empowerment	Individual empowerment will accelerate owing to poverty reduction, growth of the global middle class, greater educational attainment, widespread use of new communications and manufacturing technologies, and health-care advances.
Diffusion of Power	There will not be any hegemonic power. Power will shift to networks and coalitions in a multipolar world.
Demographic Patterns	The demographic arc of instability will narrow. Economic growth might decline in "aging" countries. Sixty percent of the world's population will live in urbanized areas; migration will increase.
Food, Water, Energy Nexus	Demand for these resources will grow substantially owing to an increase in the global population. Tackling problems pertaining to one commodity will be linked to supply and demand for the others.

GAME-CHANGERS

Crisis-Prone Global Economy	Will global volatility and imbalances among players with different economic interests result in collapse? Or will greater multipolarity lead to increased resiliency in the global economic order?
Governance Gap	Will governments and institutions be able to adapt fast enough to harness change instead of being overwhelmed by it?
Potential for Increased Conflict	Will rapid changes and shifts in power lead to more intrastate and interstate conflicts?
Wider Scope of Regional Instability	Will regional instability, especially in the Middle East and South Asia, spill over and create global insecurity?
Impact of New Technologies	Will technological breakthroughs be developed in time to boost economic productivity and solve the problems caused by a growing world population, rapid urbanization, and climate change?
Role of the United States	Will the US be able to work with new partners to reinvent the international system?

POTENTIAL WORLDS

Stalled Engines	In the most plausible worst-case scenario, the risks of interstate conflict increase. The US draws inward and globalization stalls.
Fusion	In the most plausible best-case outcome, China and the US collaborate on a range of issues, leading to broader global cooperation.
Gini-Out-of-the-Bottle	Inequalities explode as some countries become big winners and others fail. Inequalities within countries increase social tensions. Without completely disengaging, the US is no longer the "global policeman."
Nonstate World	Driven by new technologies, nonstate actors take the lead in confronting global challenges.

Report on Disaster Risk Reduction 2013 United Nations,2013 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction UNISDR The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales It examines how paradoxically business investments that aimed to strengthen competitiveness and productivity may have inadvertently contributed to increasing risks This report seeks to engage businesses in a dialogue on disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society

Europe and the Spectre of Post-growth Society Piotr Świtalski,2014 Europe has been going through its most serious crisis of values since the fall of communism In public discourse economic and social pressures have overshadowed the other dimensions of the crisis including societal values However the crisis of values would appear to be more than simply an effect of the recession Europeans have lost trust in democratic institutions at all levels European national and local Rising xenophobia and discrimination against minorities undermine the vitality of the European model of tolerance Europe is plagued by endemic corruption which costs it more than 100 billion euro annually triggering political instability Some believe that once Europe is back on the path of growth the crisis of values will disappear and that there will be a resurgence of faith in European integration But in the long term growth in Western societies may be impaired by serious headwinds resulting from demographic trends and rising inequalities and Europe may become the first post growth society European societies are already changing their traditional characteristics as a result of exposure to the effects of two global mega trends the empowerment of the individual and cosmopolitisation Can the European project be of relevance when addressing these challenges What role in this process can be played by the Council of Europe which is the embodiment of the idea that Europe is bigger than the European Union and the European agenda is richer than the economy and politics
