Fundamentals of Crime Mapping Rebecca Paynich, Bryan Hill, 2013-03-18. The Second Edition of the popular *Fundamentals of Crime Mapping: Principles and Practice* walks readers through the research theories and history of GIS in law enforcement. This accessible text explains the day-to-day practical application of crime analysis for mapping. Factual data from real crime analysis is included to reflect actual crime patterns, trends, series, and what an officer or analyst can expect to see when he or she sits down to analyze and apply concepts learned. Special topics discussed include an up-to-date discussion of the current crime trends in rural and urban areas, the major ecological theories of crime, the notion of geographic profiling, empirical research using crime mapping tools, basic mapping terminology, and more. New to the Second Edition: All exercises and examples have been updated to reflect ArcGIS 10.0 and Excel 2010. Includes a workbook with engaging exercises to offer hands-on application of the material. All exercises and graphics have been updated to account for ArcGIS 10.0 and Excel 2010, though all exercises and examples for Excel 2007 remain. Contains a NEW chapter discussing the various types of policing with an emphasis on the Compstat process, intelligence-led policing, and problem-oriented policing.

Multicriteria Location Analysis H. A. Eiselt, Vladimir Marianov, Joyendu Bhadury, 2023-03-01. This book applies Multicriteria Decision Making (MCDM) tools and techniques to problems in location analysis. It begins with a generic model for MCDM and subsequently develops specific versions of the technique for particular location problems. Throughout the book, MCDM is understood to encompass all tools and techniques that choose or rank existing or feasible solutions, including discrete multi-attribute decision making (MADM) problems, which typically include an attribute table that specifies the consequences of each decision with regard to the given criteria, as well as multi-objective linear problems (MOLPs) which incorporate all objectives in a single optimization problem. The book is organized as follows: the first four chapters introduce readers to the basic tools and techniques used in single objective optimization, multicriteria decision making, location analysis, and other tools such as statistical regression and geographical information systems. This is followed by ten chapters on model applications, each of which introduces readers to a specific location problem and applies one technique to solve it. The book is then wrapped up in a closing chapter that looks at the location process from a practitioner's point of view. This book is intended as a textbook for upper undergraduate and master level courses on location analysis. It will also benefit decision makers who actually need to locate facilities.

Perspectives in Medical Geography Amy J. Blatt, 2014-06-11. Medical geography is a fascinating area of rapidly evolving study that aims to analyse and improve worldwide health issues based on the geographical factors which have an impact on them. *Perspectives in Medical Geography* will appeal to both novice and seasoned researchers looking to be informed on the latest theories and applications in the field. Chapters represent a wide range of industries, ranging from private/public universities to private companies to non-profit foundations. Contributors describe ways in which map and

geography librarians can engage in public health research creating data standards archiving map collections and providing mapping GIS services In addition to compiling current theories and practices related to medical geography this volume also features commentaries from two pre eminent geography librarians sharing their perspectives on this emerging field and how map and geographic information librarians can engage in health related research through their profession This book was originally published as two special issues of the Journal of Map Geography Libraries

A Research Guide to Cartographic Resources Eva H. Dodsworth,2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets
