The initial assessment should be completed by acquiring as much of the patient as is reasonable in the circumstances to facilitate full life or fire examination. To obtain the patient's dignity, it is often easier to undertake a full examination through the opening while awaiting a later examination in the privacy of the ambulance. Clinical assessment, when with consent or consent is deemed to be refused, should be based on evidence of bleeding.

It is also important to recognise the effect that the environment can have on the patient, particularly if it is cold, raining, very hot etc. The provider should seek to minimise the effect of the environment on the patient, for example, by keeping the patient protected from the elements.
