

STEPS TO MACHINE SAFETY

1 Keep safeguards affixed and secured to the machine.

2 Don't allow guards or falling objects to create pinch point hazards within the moving parts.

3 If there's a problem with the guard, stop operation, and promptly tell your supervisor.

4 Never leave work area while parts are moving.

5 Lockout/tagout the machine when guards need to be removed for adjusting or cleaning.

6 Lubricate machine with guard on. If removal is needed, shut down, lockout and keep a safe distance away.

7 Only operate machine with guards in place. Use alternative guarding methods if needed.

8 Do not operate the machine if guards are damaged, missing or provide inadequate protection.

9 Long hair, jewelry, gloves and loose clothing are entanglement hazards and should be kept away from machinery.

10 If you're unfamiliar with machine safety or proper guard use, get supervision involved to assist you.
