

Guide to Good Dairy Farming Practice

Dairy farmers' production systems worldwide must be able to combine profitability with the responsibility of protecting human health, animal health, animal welfare and the environment. They, as the primary producers in the supply chain, must be given the opportunity to add value to their product by adopting methods of production that satisfy the demands of processors and <http://www.software995.com/customers>. In order to do this, individual dairy farmers need a single guide on how to achieve this at a practical farm level. This guide should follow a proactive approach rather than reactive.

Dairy farmers, who aim to ensure the safety and quality of the raw milk produced should satisfy the highest expectations of the food industry as well as consumers. The farm practices should ensure that the milk is produced by healthy animals under acceptable conditions in balance with the local environment. The basic principles for production, processing and handling of milk and milk products are:

- 1) All Dairy products from raw material production to the point of consumption should be subject to Good Agricultural Practices (GAP) and Good Manufacturing Practices (GMP), and should meet the appropriate level of public health protection.
- 2) Good hygienic practices should be applied throughout the production and processing of milk and milk products
- 3) Appropriate hygienic practices for milk and milk products should be implemented on the basis of The codex Recommended international Code of Practice-General Principle of Food Hygiene.
- 4) GAP/GMP together should be effective
- 5) Good farming practices ensure the marketing of safe, quality assured milk and milk products. The role of dairy farmers is to ensure that good agricultural, hygienic and animal husbandry practices are followed. The aim should be to focus on preventing the problem to appear at the farm level rather than solving it after it has occurred
- 6) The objective of this guide is to provide information and to highlight those areas that are essential to manage a dairy farm, identify the objectives in dealing with each of the areas, identify GAP and suggest control measures that can be implemented to achieve these objectives.
- 7) The guiding objective for good dairy farming practice is that milk should be produced on-farm from health animals. To achieve this, dairy farmers need to apply GAP in the following areas:
- 8) Animal health
- 9) Milking hygiene
- 10) Animal feeding and water
- 11) Animal welfare
